Annotations

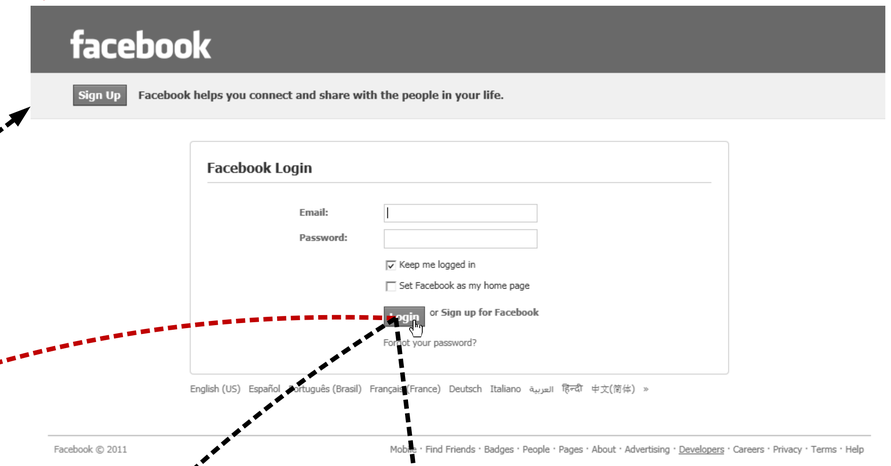
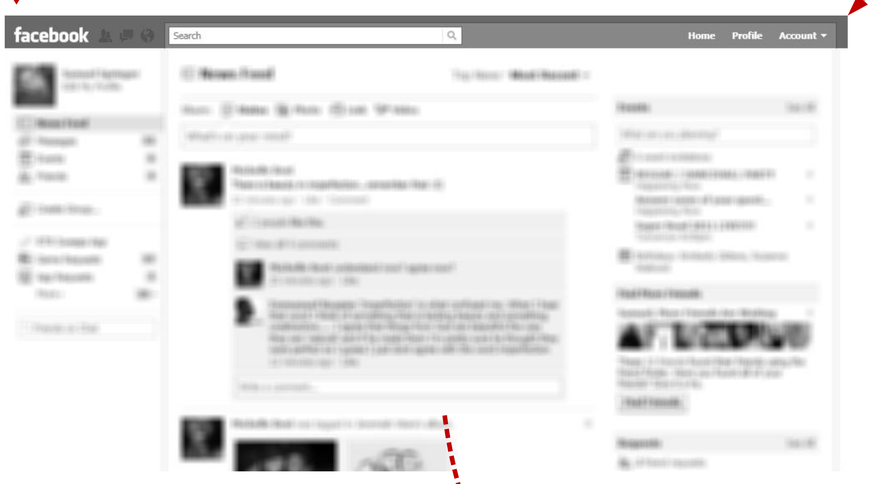
Facebook Login Overlay

Facebook Login Form



After the user logs in, Facebook redirect to the user's Facebook page. This is a horrible experience as it would be better if Facebook redirect to the calling template on AMEX. Not sure if this is a request that can be met.

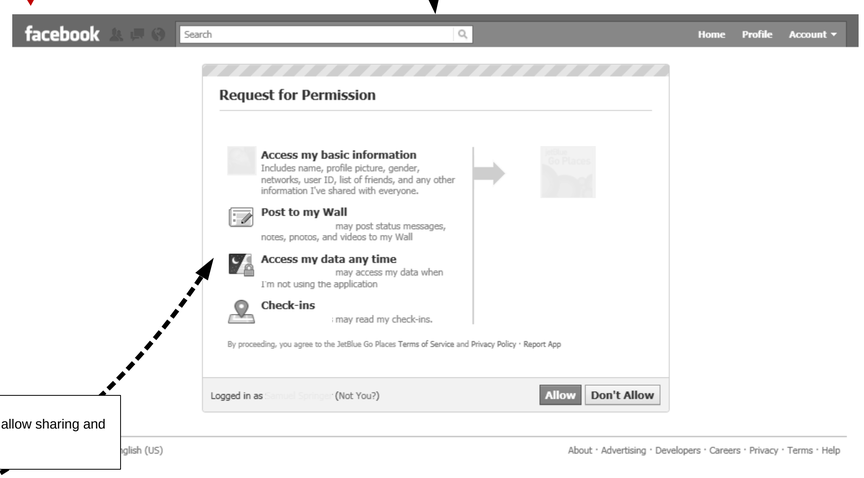
Facebook Permissions Request



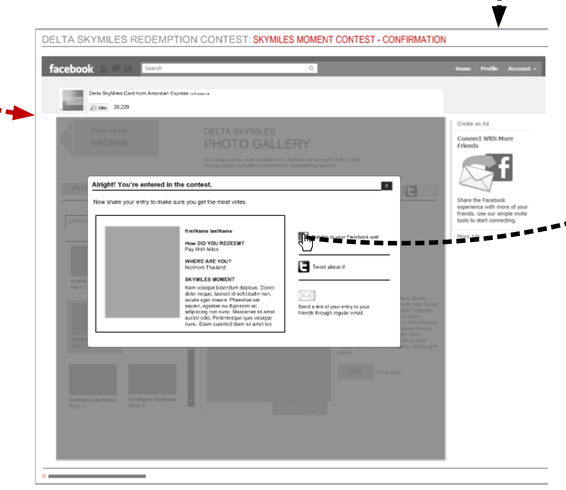
If possible Facebook should redirect the user to the calling template

This would be the ideal path after the login for users who haven't allow sharing or profile access

Facebook Permissions Request



The user is then forced to find their way back to AMEX page on Facebook



The user must allow sharing and profile access.
