Up-to-the-minute stock market and business news

Challenge

Still seen as the definitive resource for business and stock related information, CNBC needed to revolutionize their digital assets to stay ahead of the curve, maintain, and growth their customer base amidst all the new players. The challenge for the team was a redesign that to showcase CNBC as a forward thinking company who understood the needs of the business news consumer, and was aware of the behavioral shift in the use of mobile devices. Some important things we had to consider to improve on the current app:

- Persistent live TV/audio player
- Video on demand - preferences and restrictions for international vs. local user
- Alerts, Charting
- TVE everywhere, use of Apple's Airplay
- Maintaining accurate user profile information between the app and CNBC 360 data

Idea

It was critical to conduct stakeholder interviews and do a full assessment of the current app and user behavior. This reach data would prove invaluable in shaping an application's road-map, and supporting a truly user-center design.

Ultimately the team was focused on providing a robust solution that would work seamless with the back-end architecture, and allowed for a simple, sexy and modern interface.

Solution

We created an experience that delivered a customizable interface based on user's preference. Three different levels of users (beginners, intermediate, and expert) would opt to display content matching their comfort levels. The novice user could maintain a more simplistic and streamlined experience while a more experienced user could choose to display more granular content. A video play would be front and centered with controls for minimizing to the background while maintaining the audio.

All the value features of the desktop experience were maintained but buried intuitive to prevent clutter and messy interface.

Result

With a 4.5-star rating in the App store, the response from current and new users was a direct indication of the success of the redesign and December 2013 product launch. The iPad redesign significantly influenced the redesign of the iPhone and Apple Watch apps.

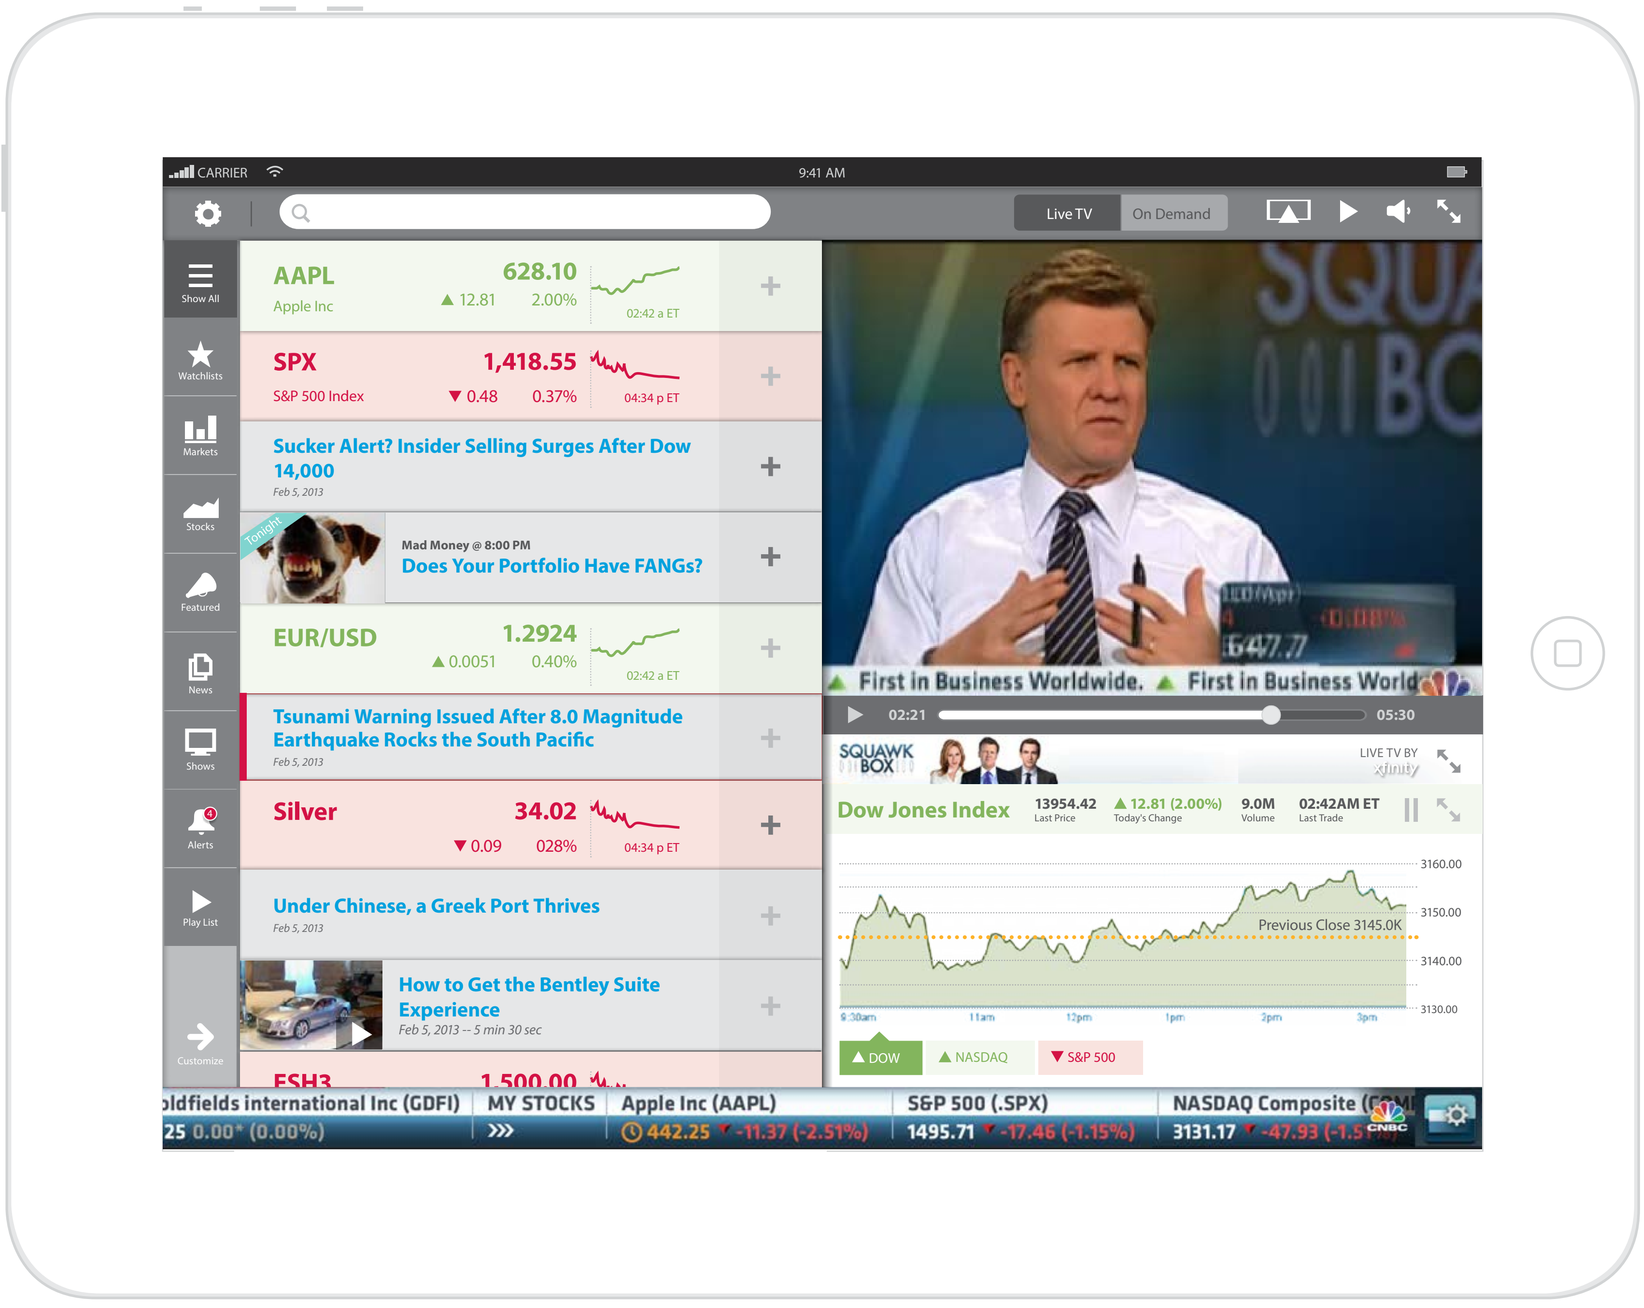
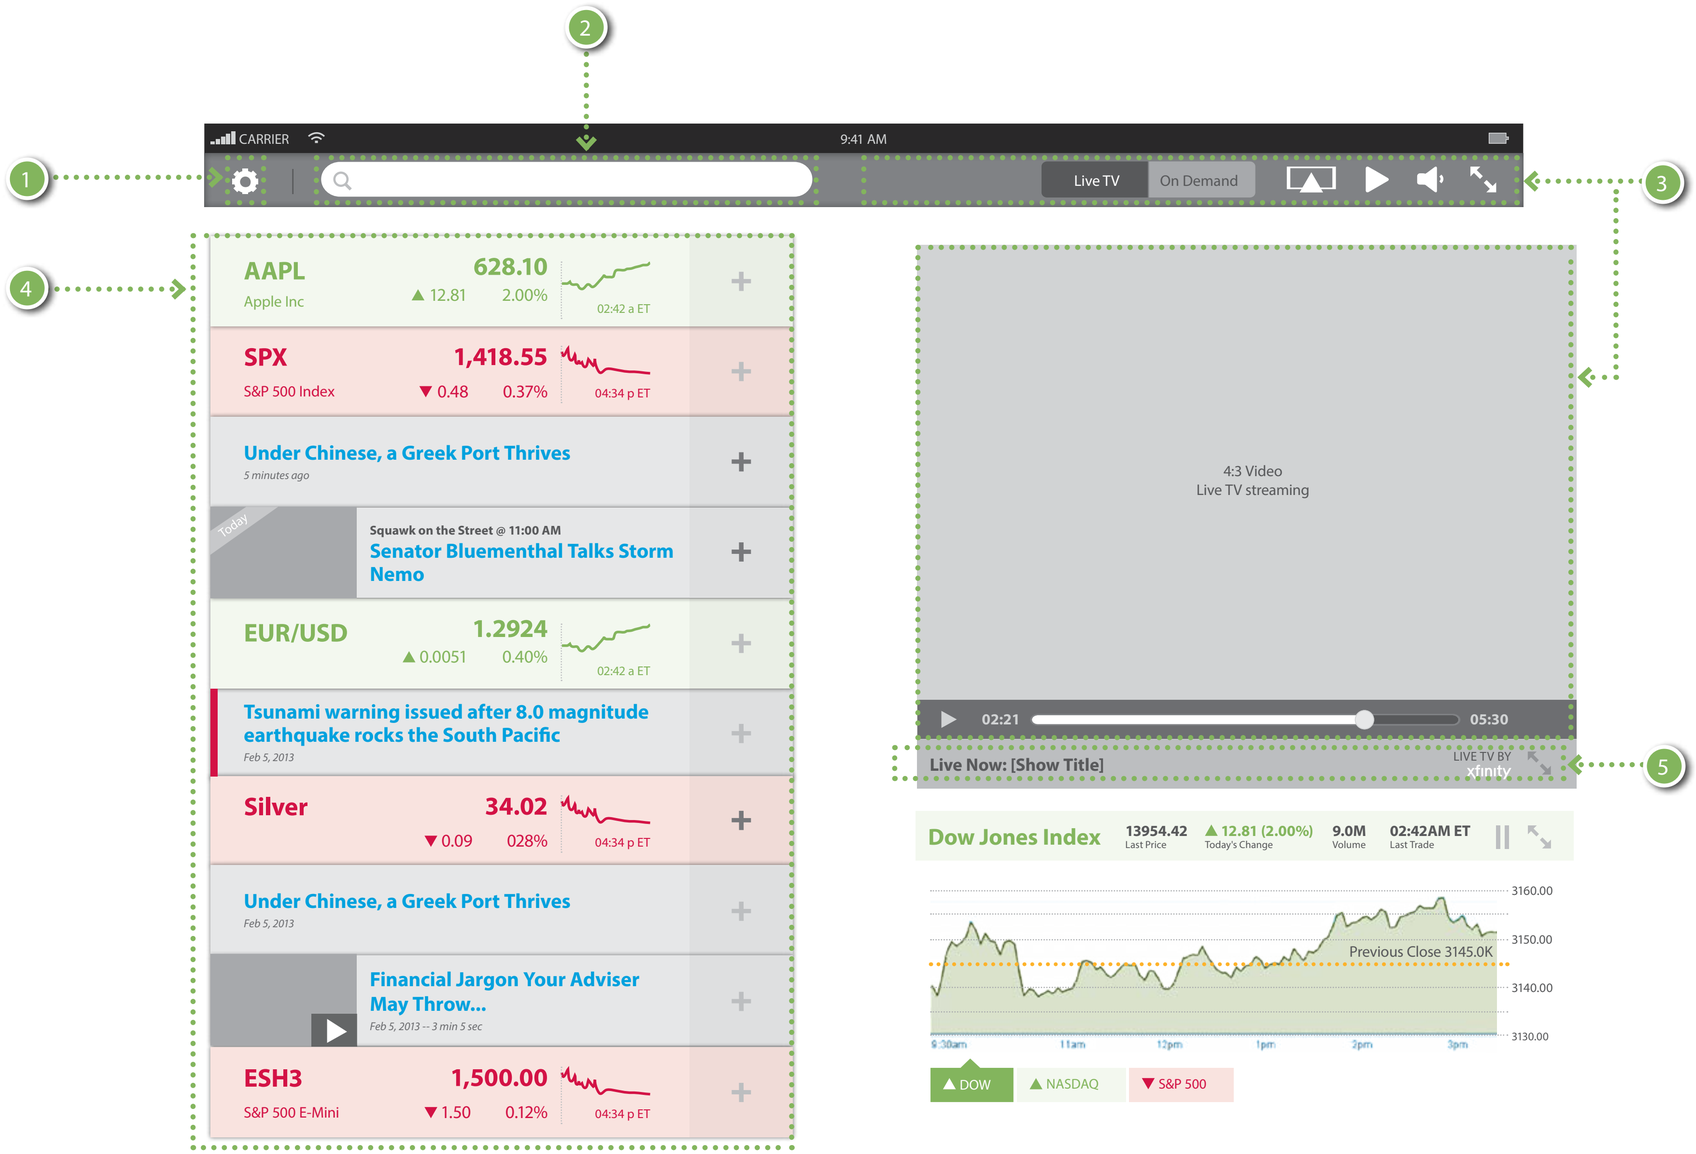
Dashboard - Default View



Annotations

1. View of the app on load



Annotations

1. Settings Icon

INTERACTION

- Tap: Display the settings panel

2. Search Form

INTERACTION

- Tap:
  - Set focus into the search bar
  - The iPad keyboard appears
- onKeyDown: feed is dynamically updated based on the characters entered

3. Authenticated Streaming

- Displays the Authenticated branding and video player
- Video will auto-play

INTERACTION

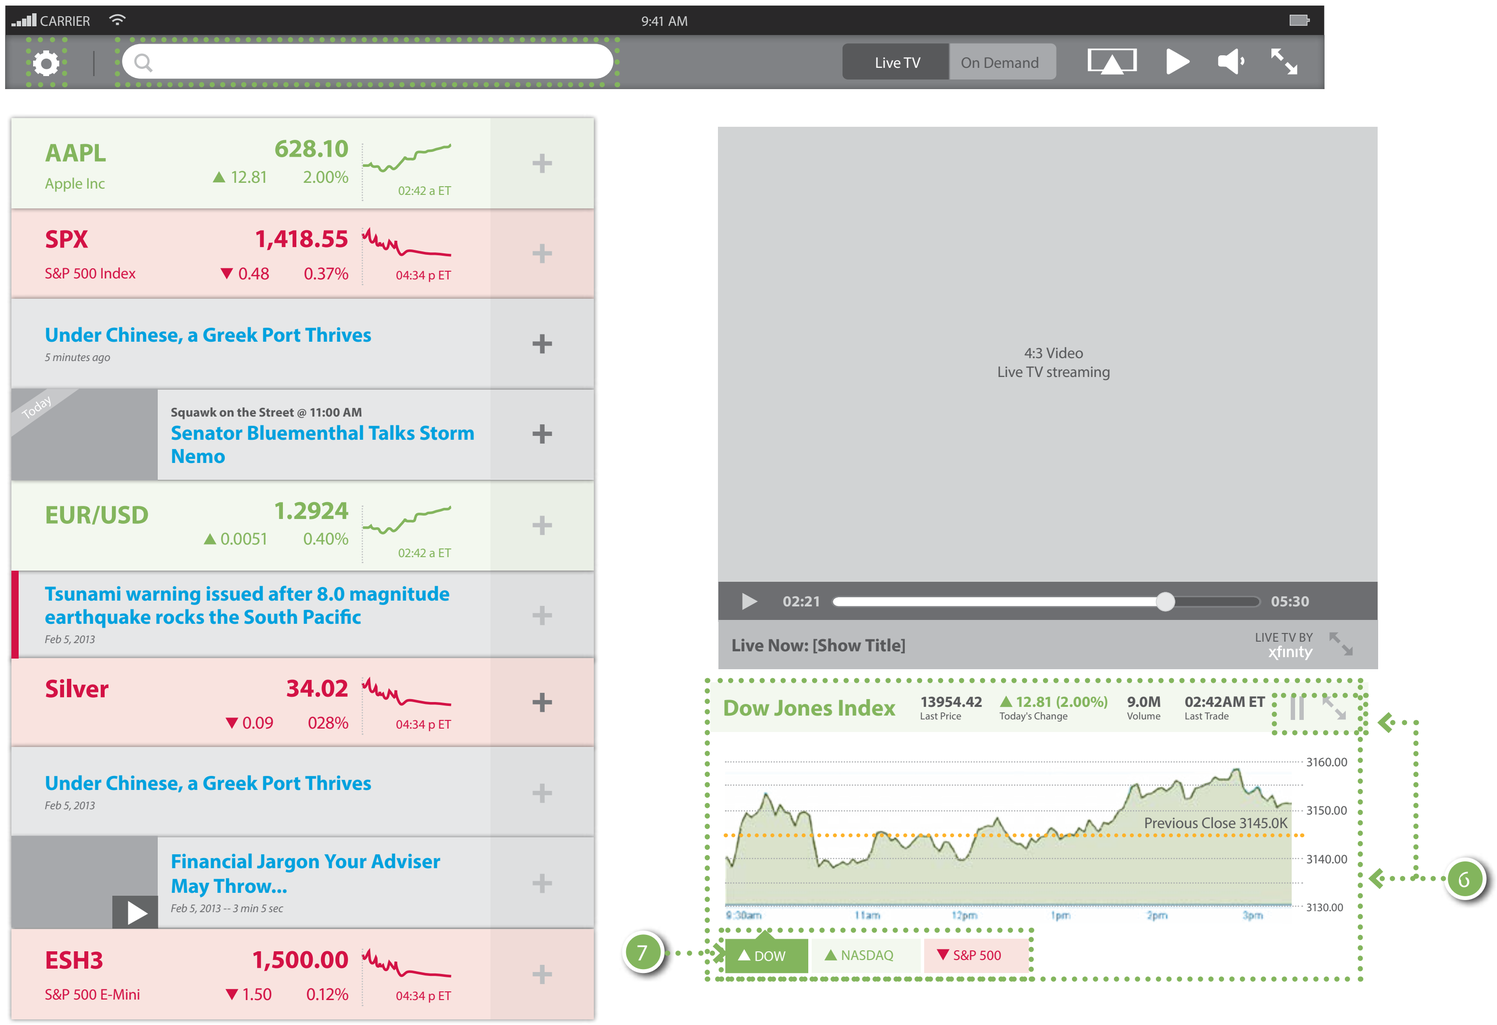
- UX for player bar defined by the default ios video player
- Air Play, Play, Volume, Full Screen controls in the top bar mirror functionality from default ios video player
- Tapping "On Demand" while watching live steam, will stop the stream and replace the video with a list of on demand content (and vice versa).

4. Feed

- Displays recently posted content types: articles, blog posts, slideshows, stocks, indexes, commodities, currencies, futures, and videos. For all items include an "add to" plus icon
- Videos: Display title, timestamp / date, video length (in HH, MM, SS) and thumbnail with play icon overlaid. Only clips will be included in the feed. Full episodes can be accessed through the show sheet, or through the "on demand" tab.
- Shows: Display name, air time, and thumbnail with banner icon overlaid. Banner icon will read "Up next" for the show that is next on the live feed. It will say "tonight" for an evening show, and "today" for a morning/afternoon show. This banner flag demarcation will happen automatically without necessitating editor's manual entry.
- Articles: Display title, date / timestamp, thumbnail (where applicable)
- Stocks / Indices: Display symbol, full name, price, # change, % change, graph. Indicate positive changes with an up arrow and green coloring. Indicate negative changes with a down arrow and red coloring.
- Breaking News: This designation can apply to an article, video, or stock item. When one of these is flagged as breaking news by an editor in the CMS, a thin, vertical, red-colored bar will appear at the leftmost portion of the feed item. This will to call attention to the users and mark it as an item of note. If an image thumbnail is associated with the item, the red bar will appear over the image.

INTERACTION

- Tap:
  - The detail sheet will slide right from the feed and the feed item will become highlighted



Annotations

5. Live Now Ribbon
   - This zone showcases content that is currently live
   - Static "Live TV provided by" includes the Xfinity logo.

   INTERACTION

   - Tap: the panel will open revealing details about the show, pushing down the market panel

6. Market Panel & Charts
   - Rotate on a timer between the following markets (U.S., Europe, Asia, Oil, Gold)
   - If Tabs exist, they will rotate on a timer from left to right.
   - Color code the background of the title bar off stocks, indices, markets to reflect positive, negative change (green for positive, red for negative).

   INTERACTION

   - Tap Chart | Spread | Tap Full View Icon: The chart will enlarge to a full screen mode
   - Swipe Up/Down: Go to the next/previous market panel
   - Tap a tab: Auto timer will pause for X seconds before resuming.

7. Market Indices
   - Include up / down arrow if change in that stock/market is up/down. Color code to match: green for up and red for down.
   - Include up to 3 in this view. If more than 3 exist, the remaining will become visible in full view mode.

   INTERACTION

   - Tap:
     - Update chart above
     - Highlight the selected index and dim the inactive indices

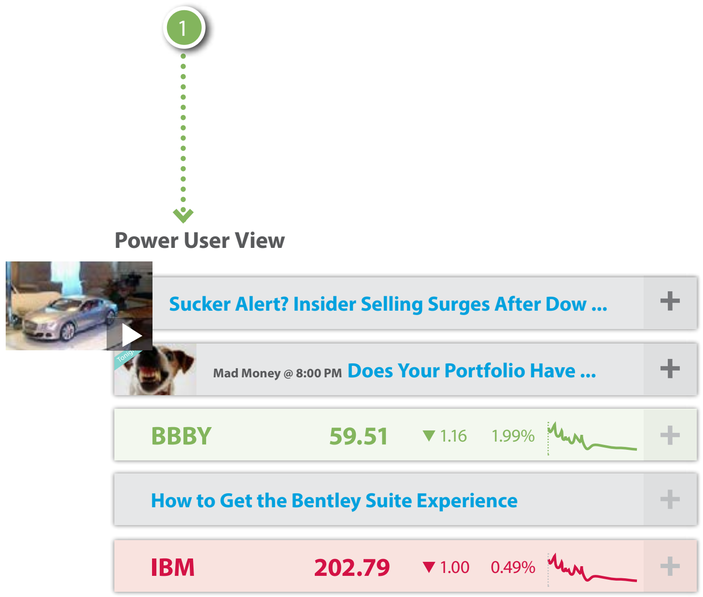
8. Ticker
   - Displays the current CNBC ticker sliding right to left
   - Inherit all functionality from the current app

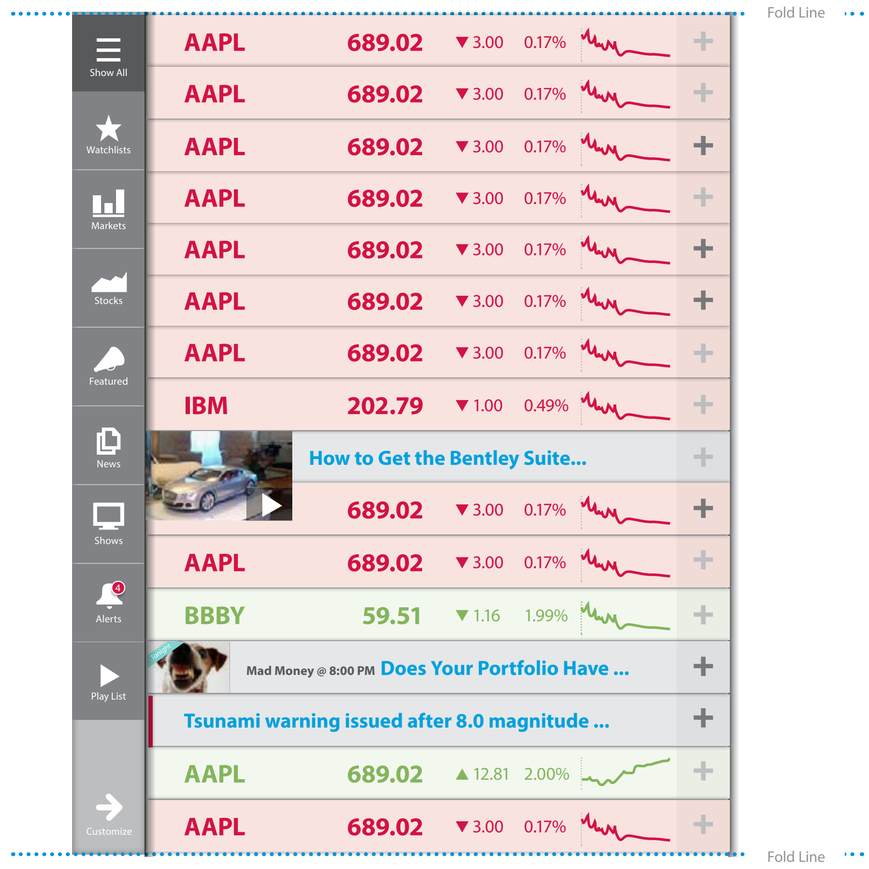
9. Save Security

   INTERACTION

   - Tap: open add to watchlist panel

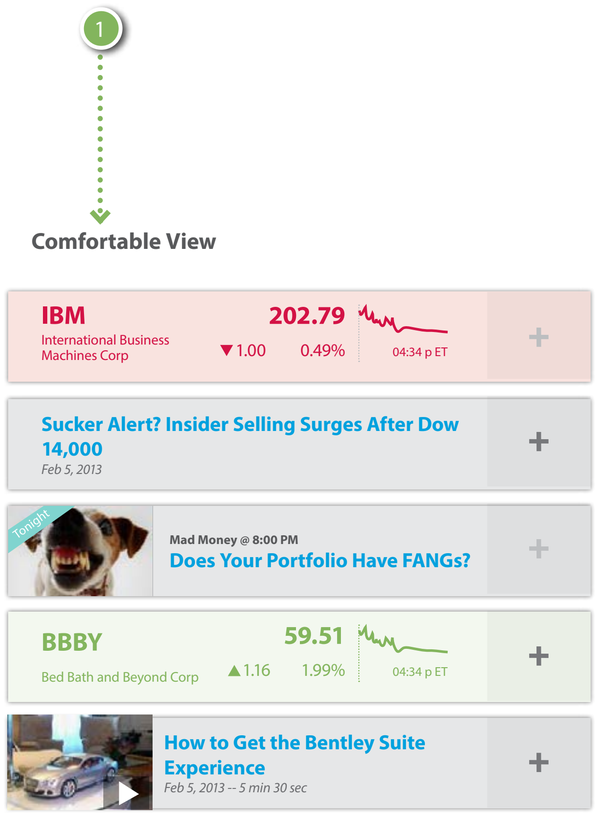
Feed Panel

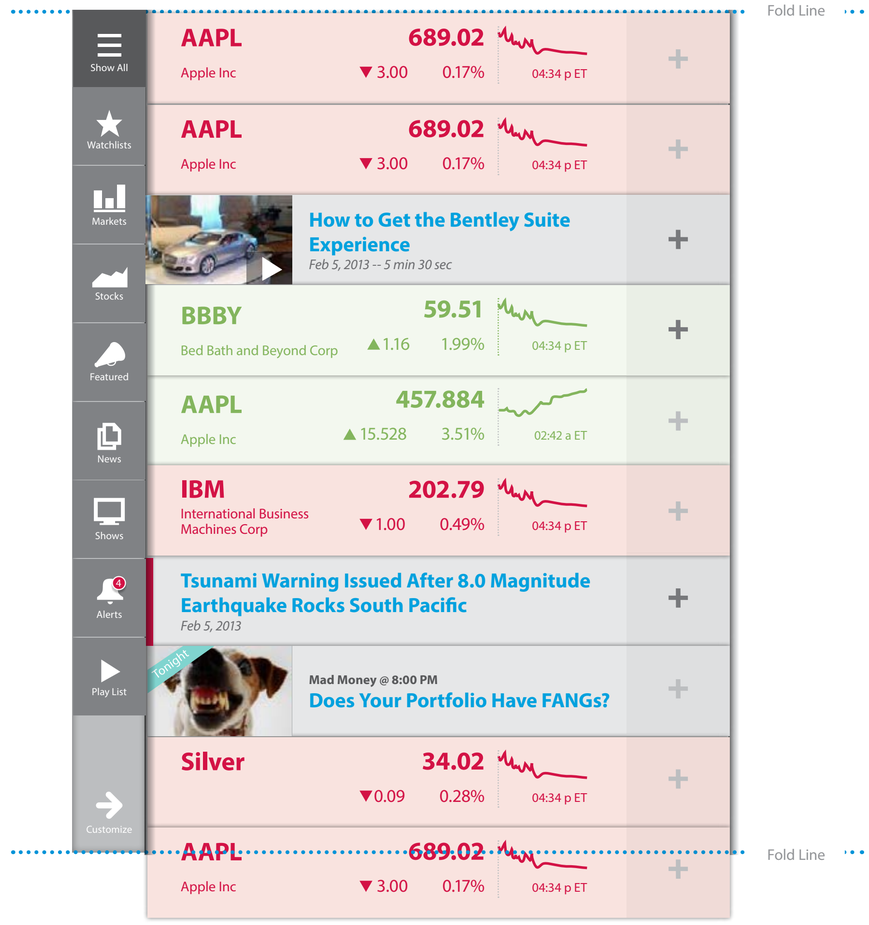




Annotations

1. Power User View
   - Will display if user has selected view in settings.
   - Height: 40px
   - Padding and Thumbnail size scale proportionally from their respective default sizes to accommodate this new height.
   - Some stock info is stripped from this view to accommodate the smaller space: Full name and Date/Time stamp
   - Some video and article info is stripped from this view to accommodate the smaller space: Date/Time stamp, video length
   - Some show details shift to accommodate the smaller space: Air time is positioned left of, rather than above show title.



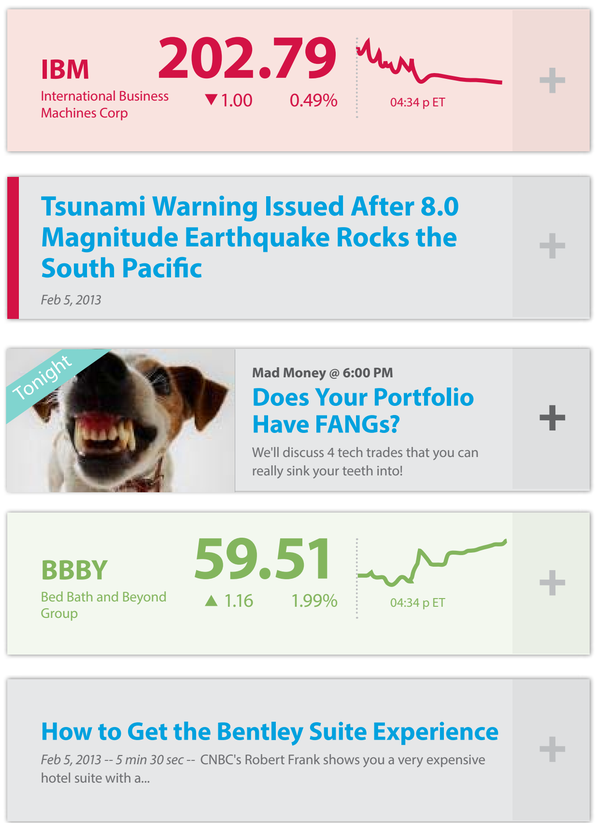


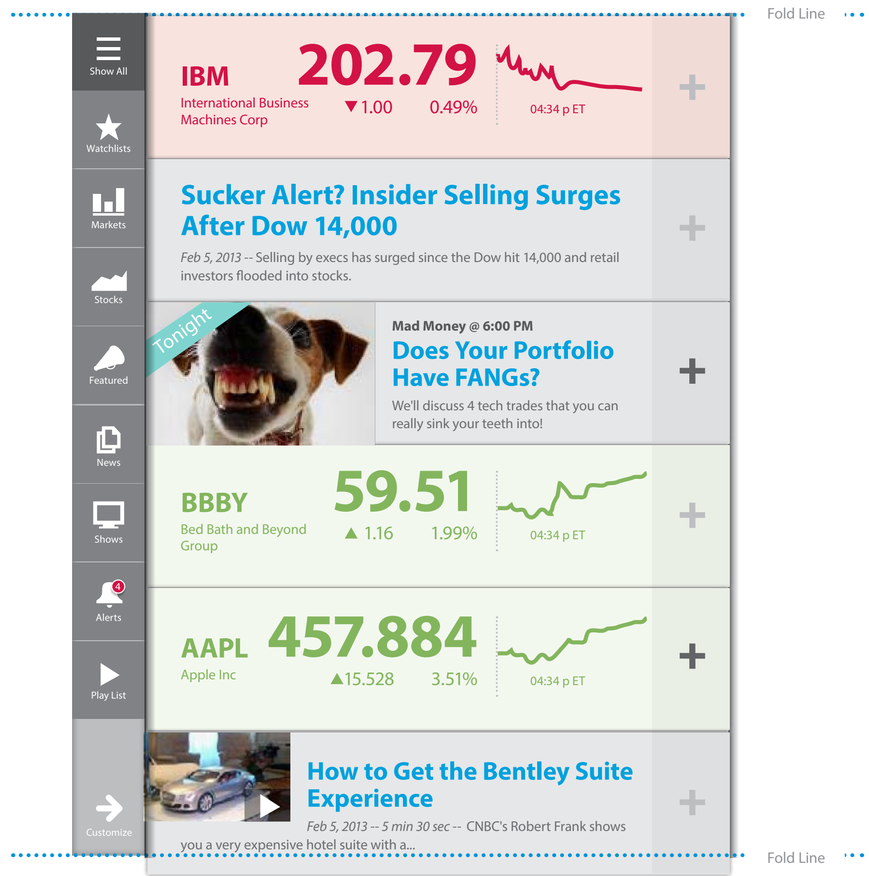
Annotations

1. Comfortable View
   - Height: 70px
   - This is the default tool setting.

1

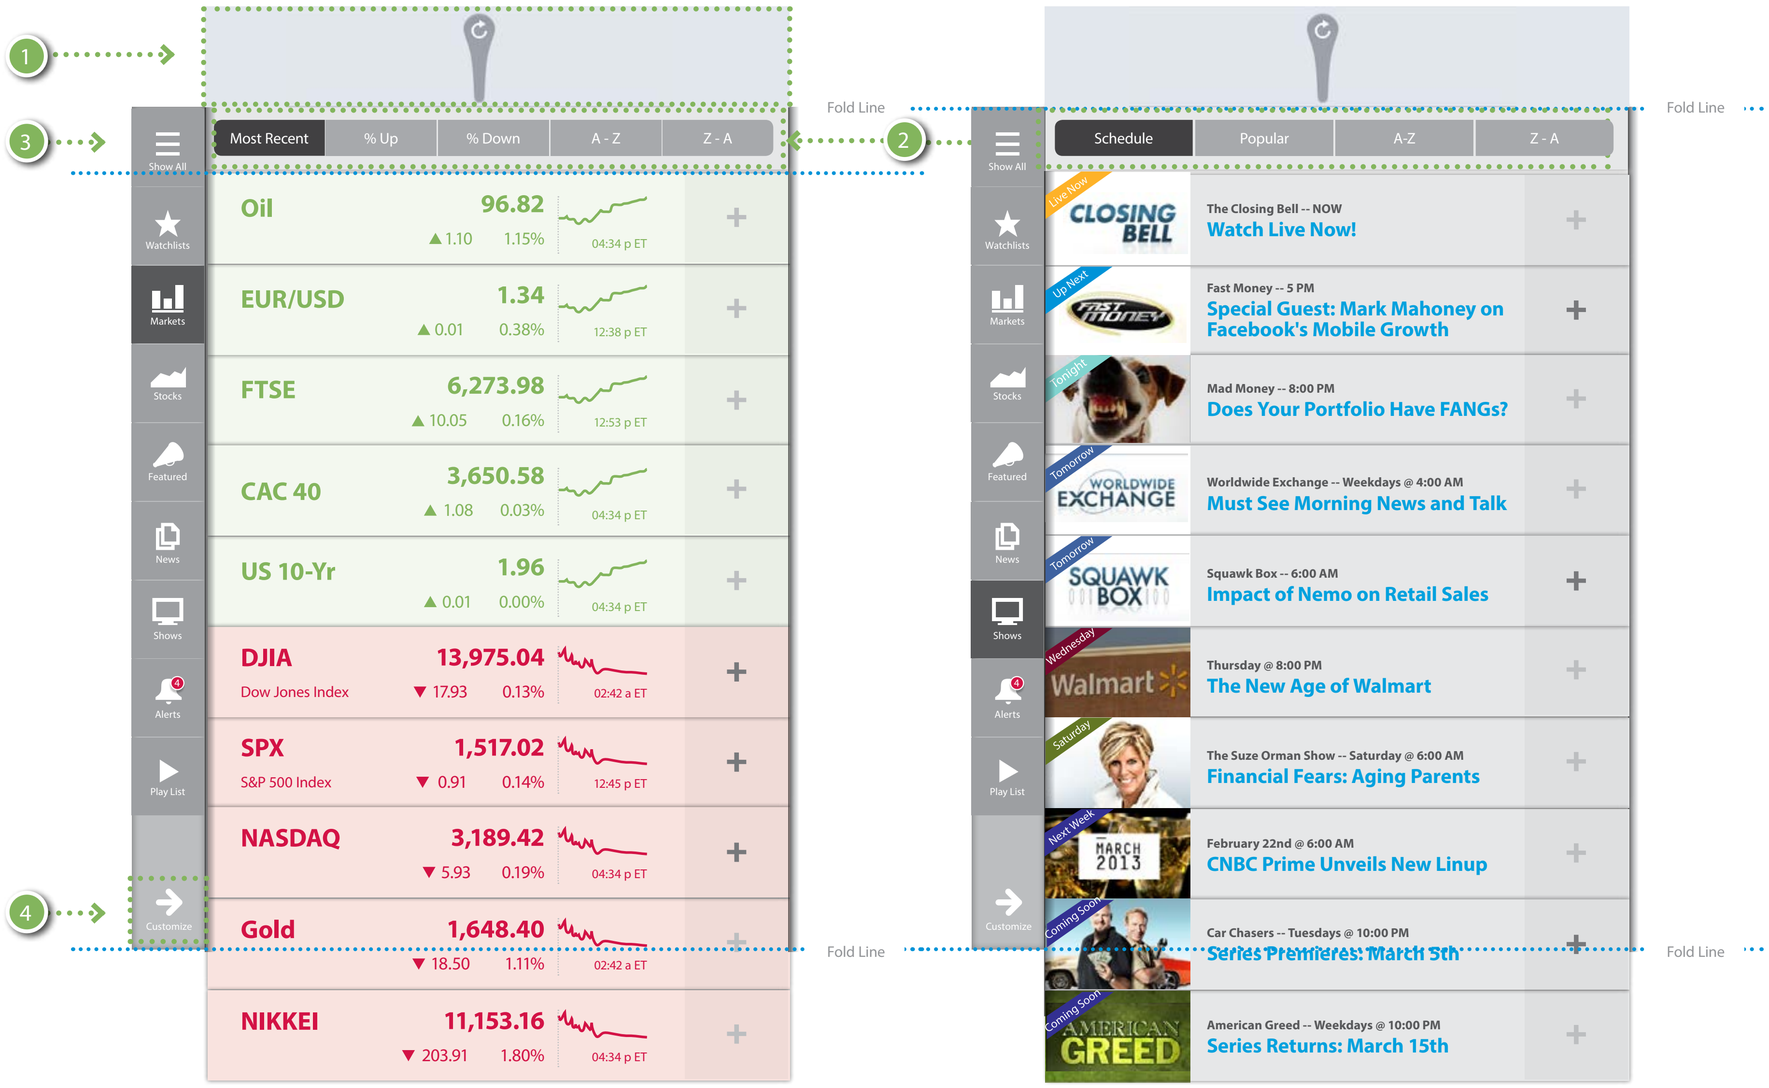
Expanded View





Annotations

1. Expanded View
   - Will display if user has selected this view in settings
   - Height: 110px
   - Padding, and thumbnail size grow proportionally to accommodate larger height.
   - Videos now include summary description as seen on the website underneath thumbnails
   - Articles now include first X characters of the story as a preview.
   - Shows now include a brief subhead line.
   - Font sizes grow for stock / indices price, article / video / show titles
   - Graphs for stocks / indices grow in thumbnail size



Annotations

1. Refresh Feed
   - Refreshes the feed

   INTERACTION

   - Pull down: From the top of the feed column will refresh the content
2. Sorting
   - Display sorting options to change the feed
   - Sorting will be available only if one section is selected from the left icons (will not be available for select all, playlist or alerts)

   INTERACTION

   - Tap: The feed will refresh based on the sort option selected
3. Filtering Feed Content
   - Display primary filtering options
   - If no feed filters are selected, the show all icon becomes active and all feed items are displayed

   CONDITION: NO FEED FILTERS ARE SELECTED

   INTERACTION

   - Tap: The feed will default to all items selected, showing all content

   CONDITION: ONE OR MORE FEED FILTERS ARE SELECTED

   INTERACTION

   - Tap: The feed will remove all items not associated with the selection(s)
4. Customize
   - Display secondary filtering options

   CONDITION: ADVANCED FILTER PANEL IS CLOSED
   INTERACTION

   - Tap | Swipe Right: Panel will slide out to display the advanced filter options

   CONDITION: ADVANCED FILTER PANEL IS OPEN
   INTERACTION

   - Tap | Swipe Left: Panel will slide in to hide the advanced filter options

Annotations

1. Watchlist / Stocks / Markets

INTERACTION

- Tap:
  - Most Recent: Order feed chronologically from newest to oldest.
  - %Up: Order feed with the highest percentage items at the top. This is the default setting.
  - %Down: Order feed chronologically from lowest percentage items to highest.
  - A-Z: Order feed alphabetically with A at the top.
  -Z-A: Order feed reverse alphabetically with Z at the top.

2. Featured / News

INTERACTION

- Tap:
  - Most Recent: Order feed chronologically from newest to oldest.
  - Breaking News: Order items chronologically that have been flagged as breaking news at the top
  - Popular: Order items chronologically that are the most popular at the top.

3. Shows

INTERACTION

- Tap:
  - Schedule: Order items according to scheduled air date. Position in feed will default to the position with the current/live show at top, future shows below, and past shows above. User would need to scroll down to see past shows. This one list will include the full schedule for the next few days. This is the default view.
  - Popular: Order items chronologically that are flagged as popular by the editors at the top. This could be popular shows, or shows the editors choose to promote.
  - A-Z: Order feed alphabetically with A at the top.
  -Z-A: Order feed reverse alphabetically with Z at the top.

Annotations

1. Show Feed Item

- Includes: show title, date / time. An additional field is required but can include either: segment title, episode title, guest(s) or more general promotional copy. Photo is required but can be a more general logo. Shows should be flagged as featured. The flag will auto update based on time (see Feed Items page).

INTERACTION

- Tap: Show sheet slides out. Promotional information for that feed item is displayed at the top of the sheet. General show information and other segments / clips is listed below. (See sheets)

2. Add to calendar

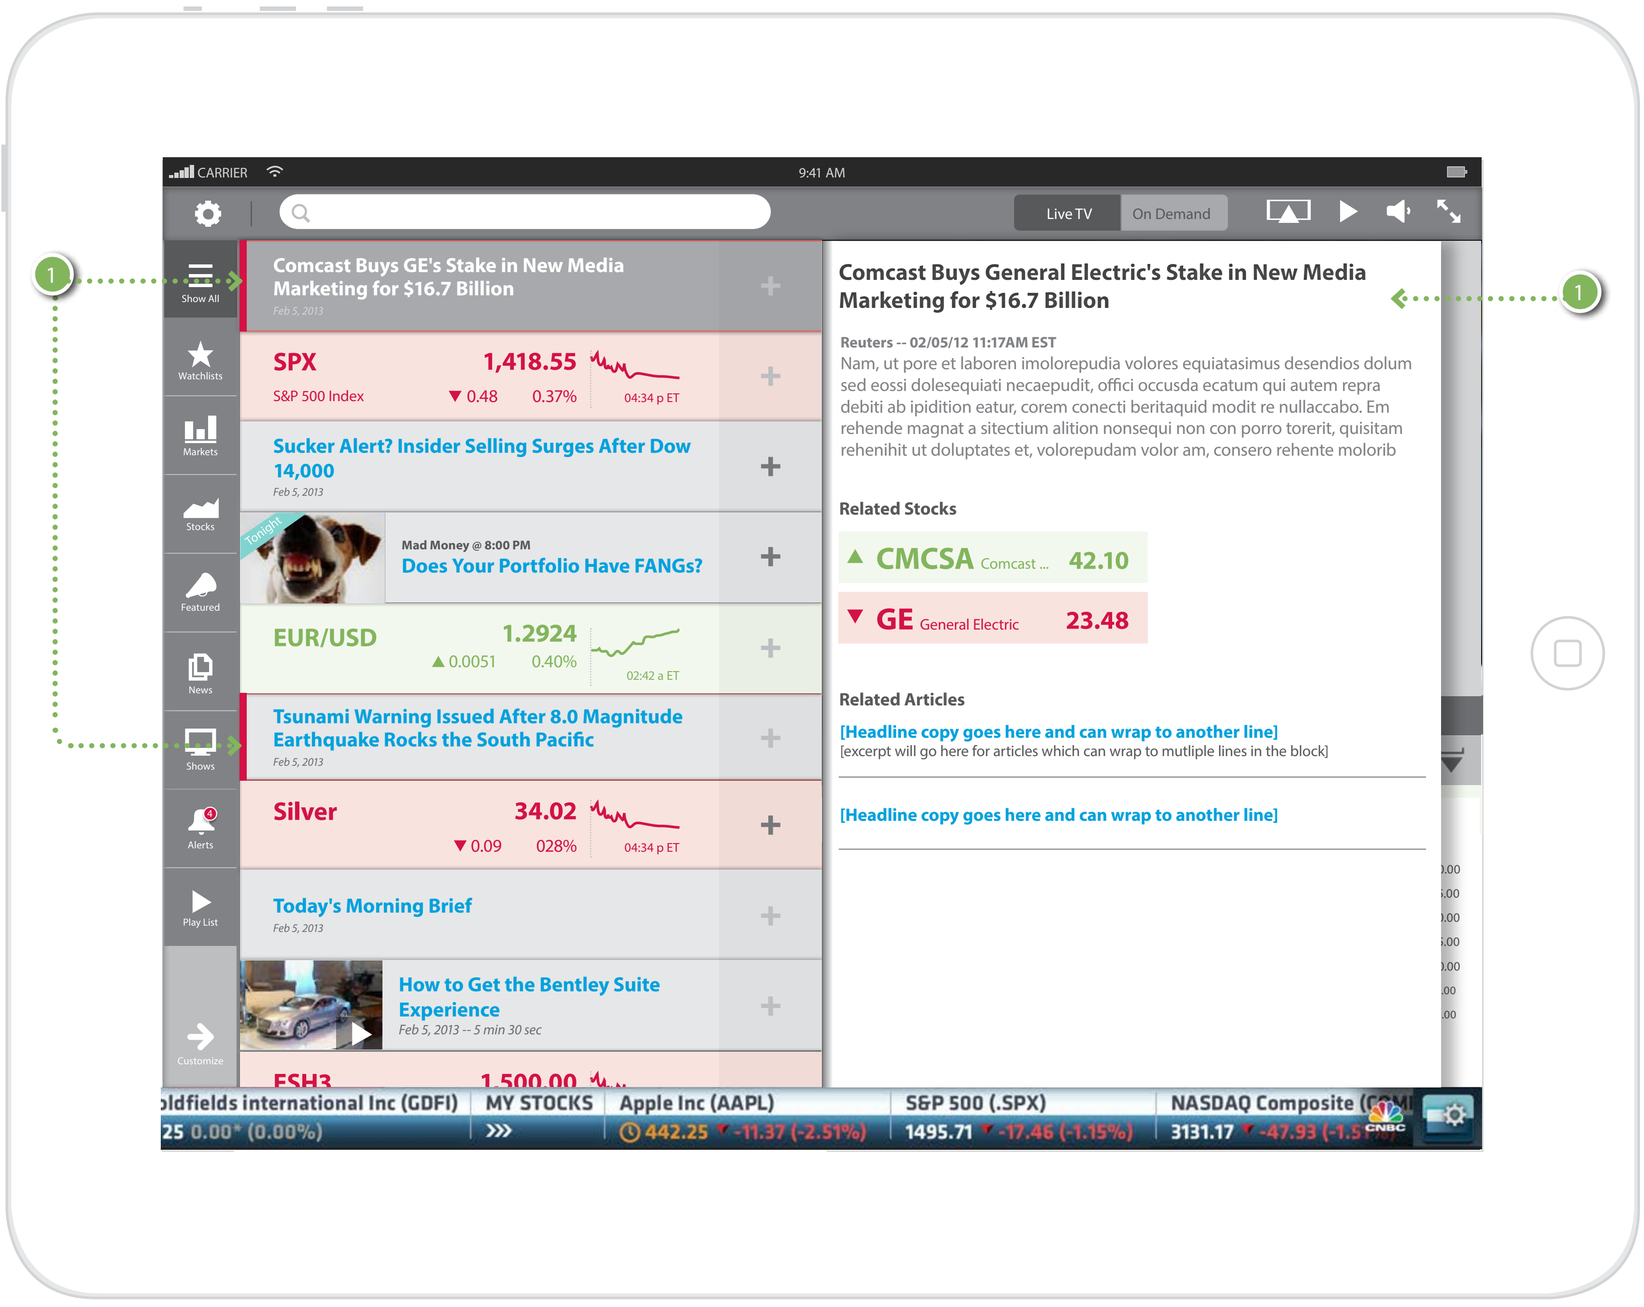
- Plus icon allows users to add that show episode / guest to their calendar where they can then invite friends or set alerts / reminders.

INTERACTION

- Tap: Plus icon highlights. ios Calendar app opens with the show item added and details pre-populated for review. Time is the date and time of the show / segment / episode. Invite is from CNBC. Segment or guest is the title. Location is CNBC plus show name. Alert and availability mirrors their system default.

3. Business Rules

- The app will discover the user's location to define which schedule to display
- What about outside US: Asia/Australia, Asia/Brunel-China-Hong Kong-Malaysia-Signapore-Indonesia-Thailand, Asia/Phillipines-Taiwan-Cambodia-Japan-Korea-Guam-Saipan-Papya New Guinea, Europe, World



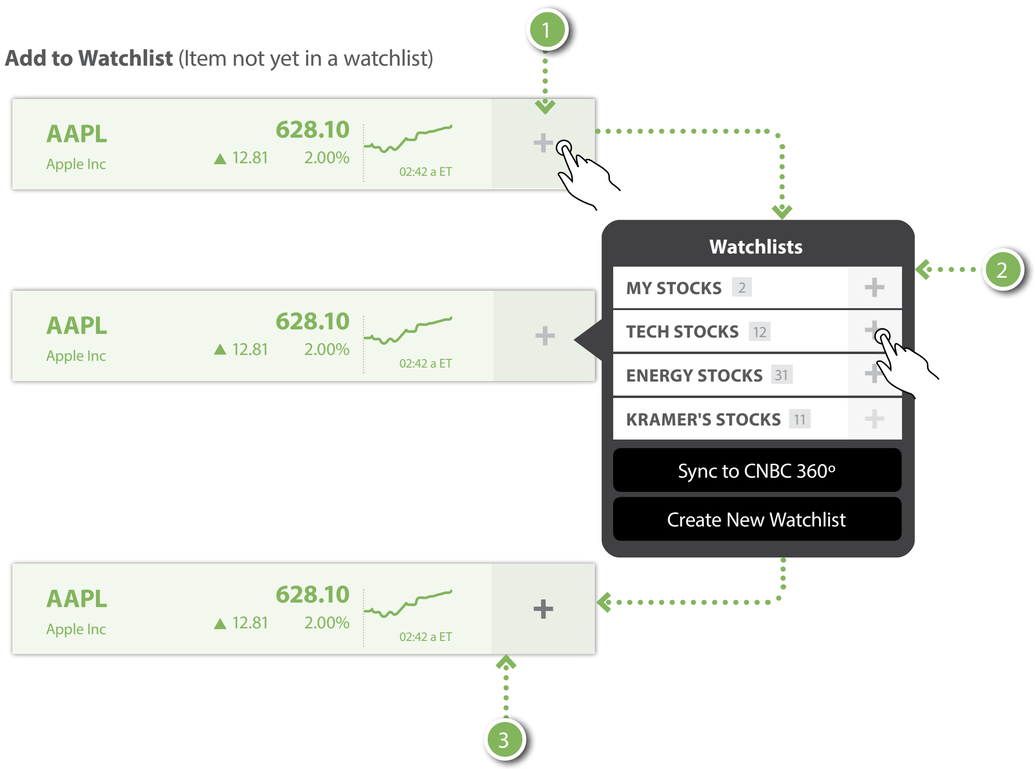
Annotations

1. Breaking News alerts
   - Includes title, date/timestamp, optional video / photo, optional story body text, optional summary
   - Items are flagged as breaking news by the editor or wire service
   - Visually indicated by a vertical red stripe, overlaid on top of a photo / video if applicable, a red border, and a drop shadow
   - Breaking news alerts are pinned to the top of the feed for 1 hour or untill another alert is issued, whichever comes first. When the alert falls from the pinned position, it is included in the feed ordered by the time it was issued.
   - Alerts can also be filtered to using the controls in the left panel.
   - Breaking news alerts are counted in the numerical visual indicator on the alerts filter icon untill the user scrolls past them in the feed, or untill they have been displayed on the screen for more than 10 seconds.

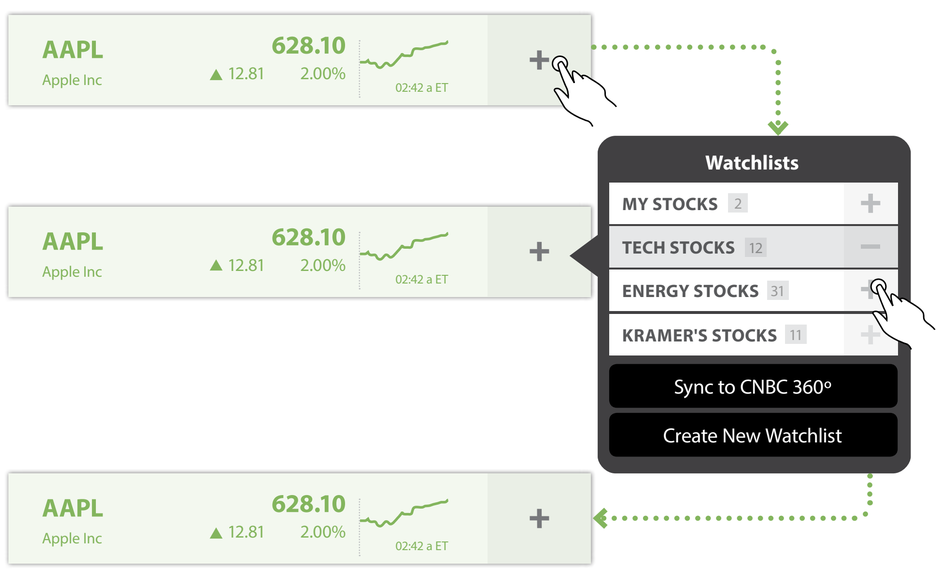
   INTERACTION

   - Tap:
     - Background color becomes darker to inidcate selection. Sheet relating to that alert slides to the right
2. Breaking News Alert Sheet
   - Includes title, time / date stamp, source. Optionally includes: story body, summary, taxonomy tags
   - If taxonomy has been included, story should also include related stocks and related articles dynamically inserted according to related taxonomy tags.

Add to Watchlist (Item not yet in a watchlist)



Add to Additional Watchlist



Annotations

1. Add to Watchlist

INTERACTION

- Tap: Display overlay with a list of defined watchlists and the option to create a new watchlist, or sync with CNBC 360 watchlists.

2. Select a Watchlist

- Watchlists is pre-populated with default watchlists including: My Stocks, Tech Stocks, Energy Stocks, and Kramer's Stocks.
- My Stocks will be empty by default
- Tech and Energy Stocks will be defined by the editorial team. However, user will have the ability to customize these lists. Once a user has added or removed a stock from one of htese lists, it is no longer managed by the editorial team on that user's account.
- Kramer's Stocks is editorially controlled and is not editable by the user to either add or remove. A disabled icon color will indicate no actions are allowed.
- Watchlists will indicate how many stocks are contained in them.

INTERACTION

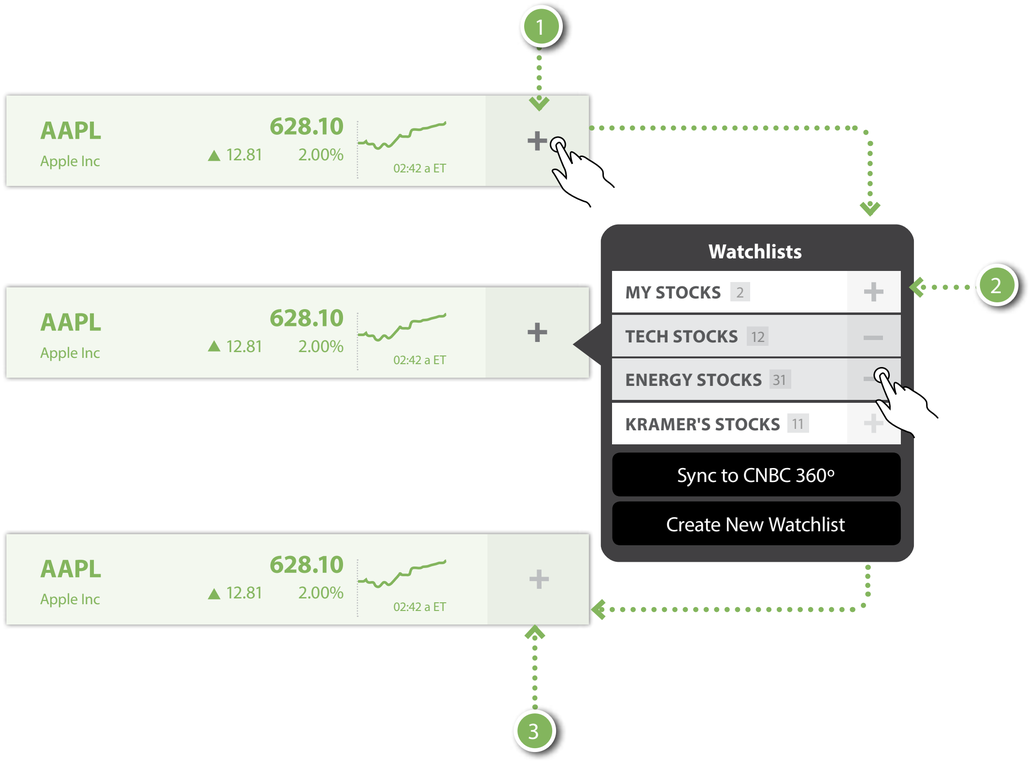
- Tap:
  - Add to the selected watchlist
  - Close overlay

BUSINESS RULE

- Watchlists cap at 50 stocks. If a watchlist contains 50 stocks, the icon will switch to disabled view.

3. Item Added

- Highlight the icon in the feed
- When the user opens the watchlist again, that item will be highlighted with a background color, the icon will switch from add (plus) to remove (minus), and the number will have been updated to reflect this change.



Annotations

1. Remove from Watchlist

   INTERACTION

   - Tap: Display overlay with the watchlist

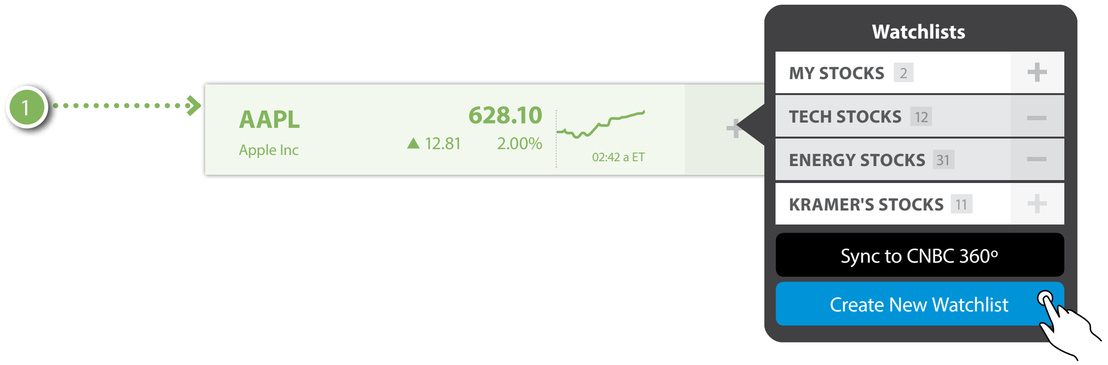
2. Delete

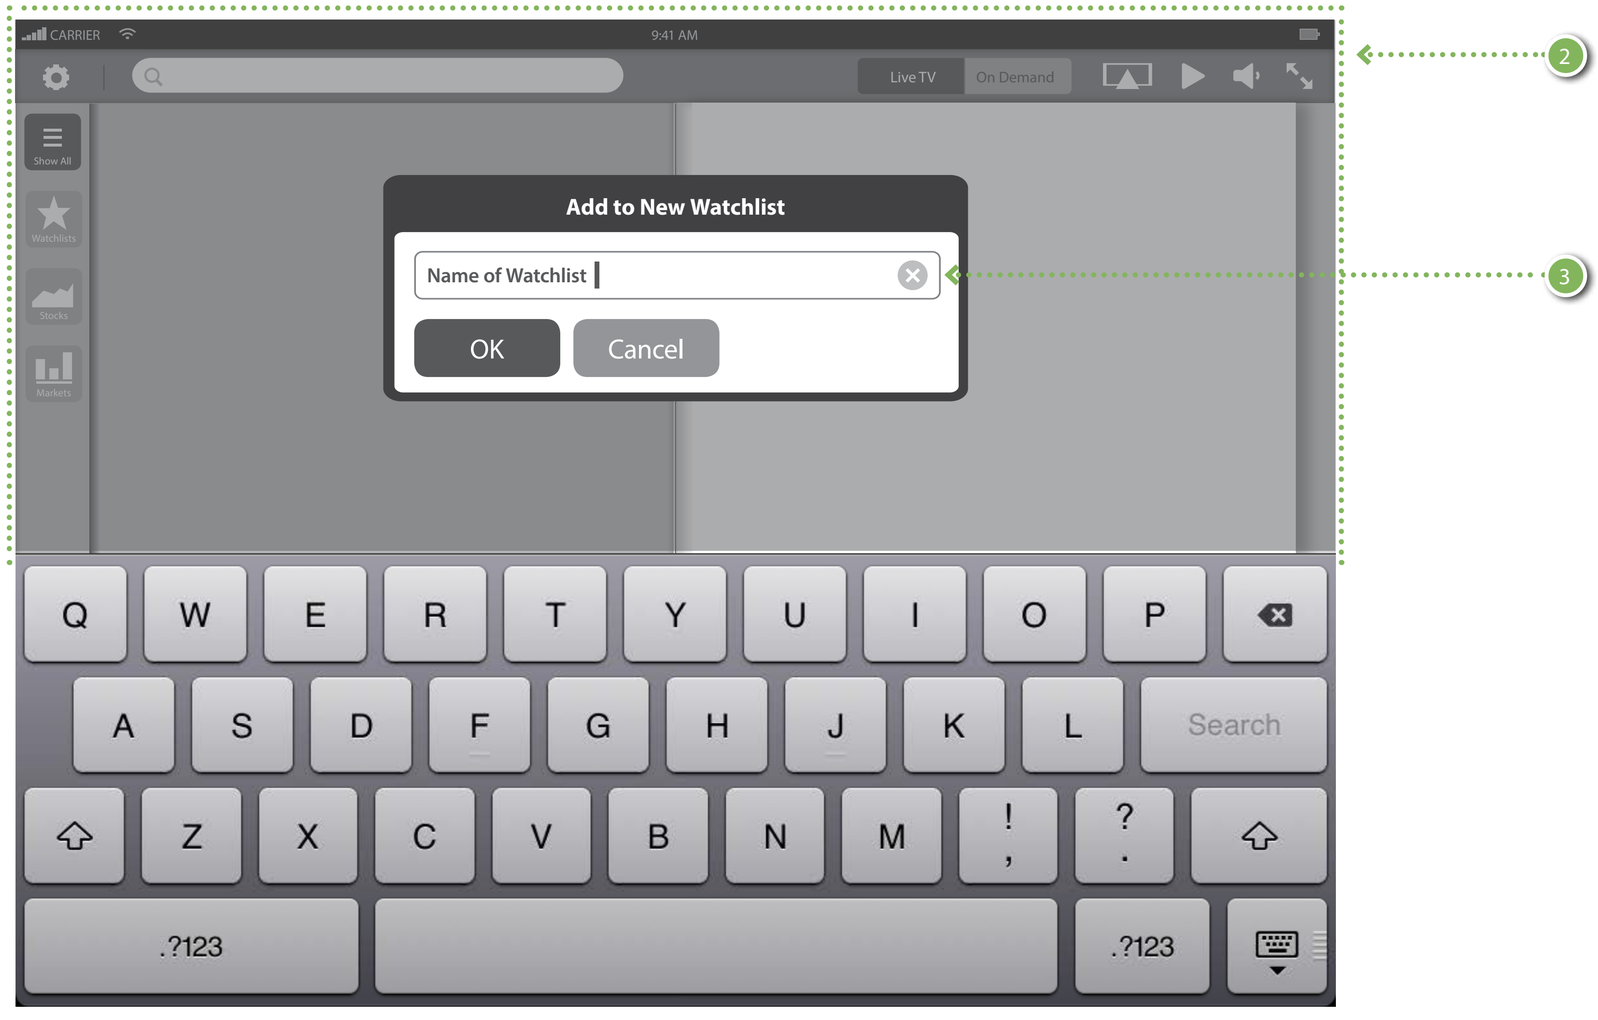
   INTERACTION

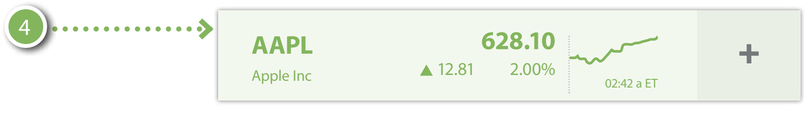
   - Tap a watchlist that the item is already included in (indicated by background color and minus icon):
     - Remove item from the selected watchlist
     - Close overlay

3. Item Removed

   - Revert the feed icon to its default state.
   - When the user opens the watchlist again, that item will no longer have the highlighted background color, the icon will switch from remove (minus) to add (plus), and the number will have been updated to reflect this change.







Annotations

1. Create New Watchlist

- Displays modal, after tapping "create new watchlist" button from the watchlist popup menu.

INTERACTION

- Tap: Display a form entry field to add the name of the new watchlist
- Previous modal closes
- Tap: Into the form field to display the iPad keyboard
- Tap: "OK" after entering the name of the new watchlist will save the security to the newly created list, close the modal and remove the keyboard. OK is disabled (with color change to indicate this state) until user has entered text
- Tap: "Cancel" to close the modal and remove the keyboard

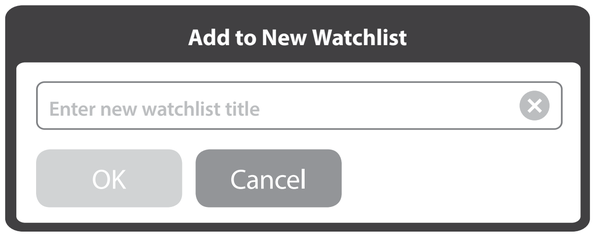
2. Name of Watchlist

- Limit the name of the watchlist to 30 characters
- Tapping X will clear the text that has been entered
- Default type will be included in the form in a watermark style grey color that reads "Enter new watchlist title". Once user begins typing this text will disappear. If user taps X to clear, this text will reappear.
- If the text entered matches the name of an already existing watchlist, the OK button will become disabled, the form border color will change to red, and a red colored error message will appear above the form, pushing the form down that reads "That title is already in use."

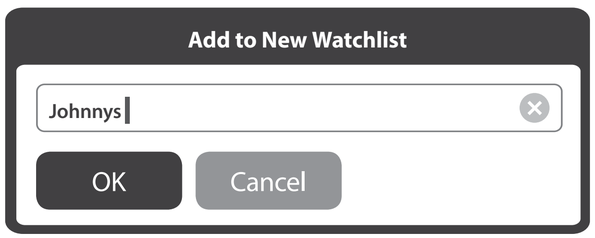
3. Item Added

- Highlight the icon
- When the user opens the watchlist again, that item will be highlighted with a background color, the icon will appear as remove (minus), and the number will reflect this one stock inside. This stock will appear at the top of the list. Watchlist order default to latest created lists at the top.

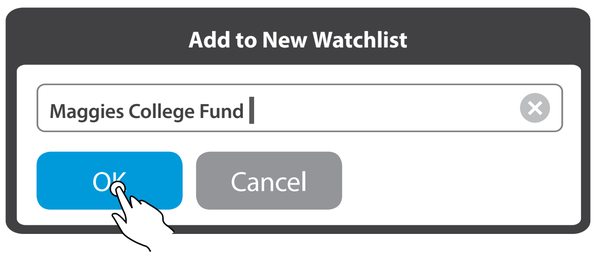
Default View



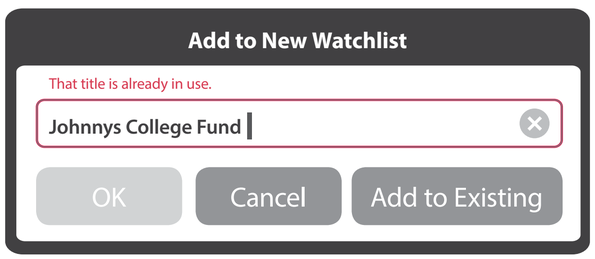
Text Entered View



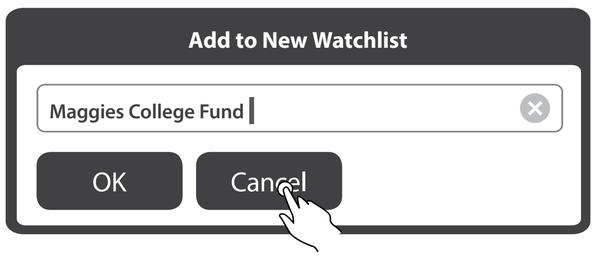
Tapping OK



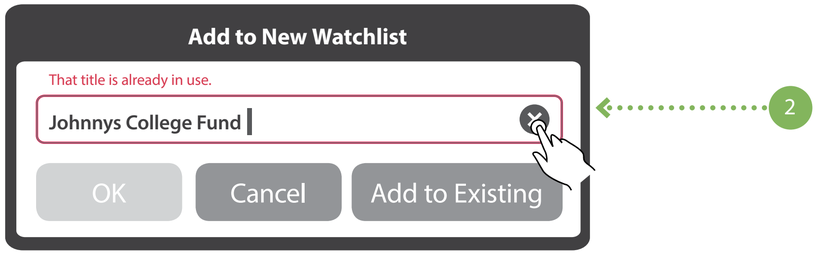
Name Already Exists Error



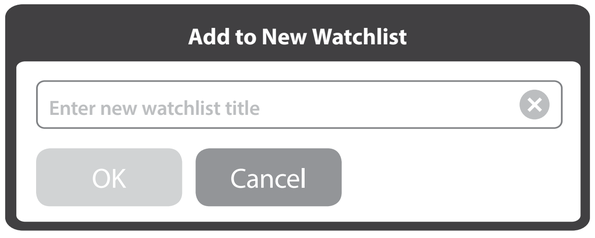
Tapping Cancel



Tapping Clear Button



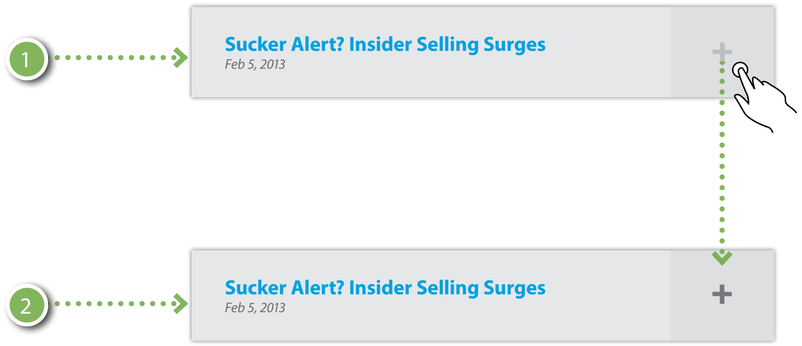
Tapping Clear Button Returns to Default State



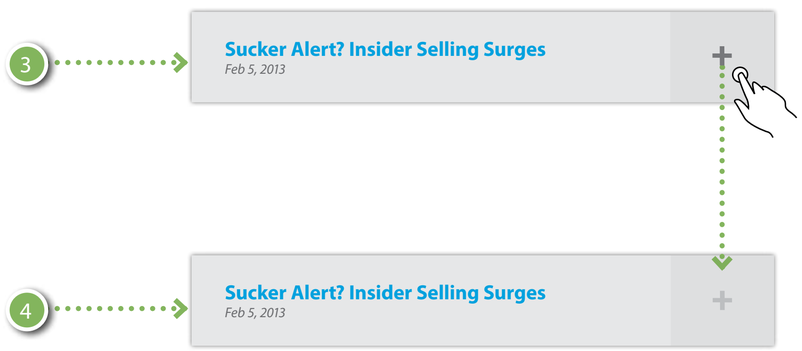
Annotations

1. See notes on previous page.
2. Error: Name already exists
   - Field will look up names of existing watchlists as user types. If he types the name of an already existing watchlist, the form will become outlined in red and an error message will display above the form field that reads "That title is already in use". The user then has the option to: a) cancel, b) tap the X button in the field to clear the text, c) use the backspace button to delete text, or d) tap the "add to existing" button to cancel the new watchlist creation and add the item into the existing list that matches the text instead.

Add to Playlist



Remove from Playlist



Annotations

1. Add to Playlist

   INTERACTION

   - Tap: Saves the item to the play list

2. Item Added

   - Highlight the icon and text

3. Remove from Playlist

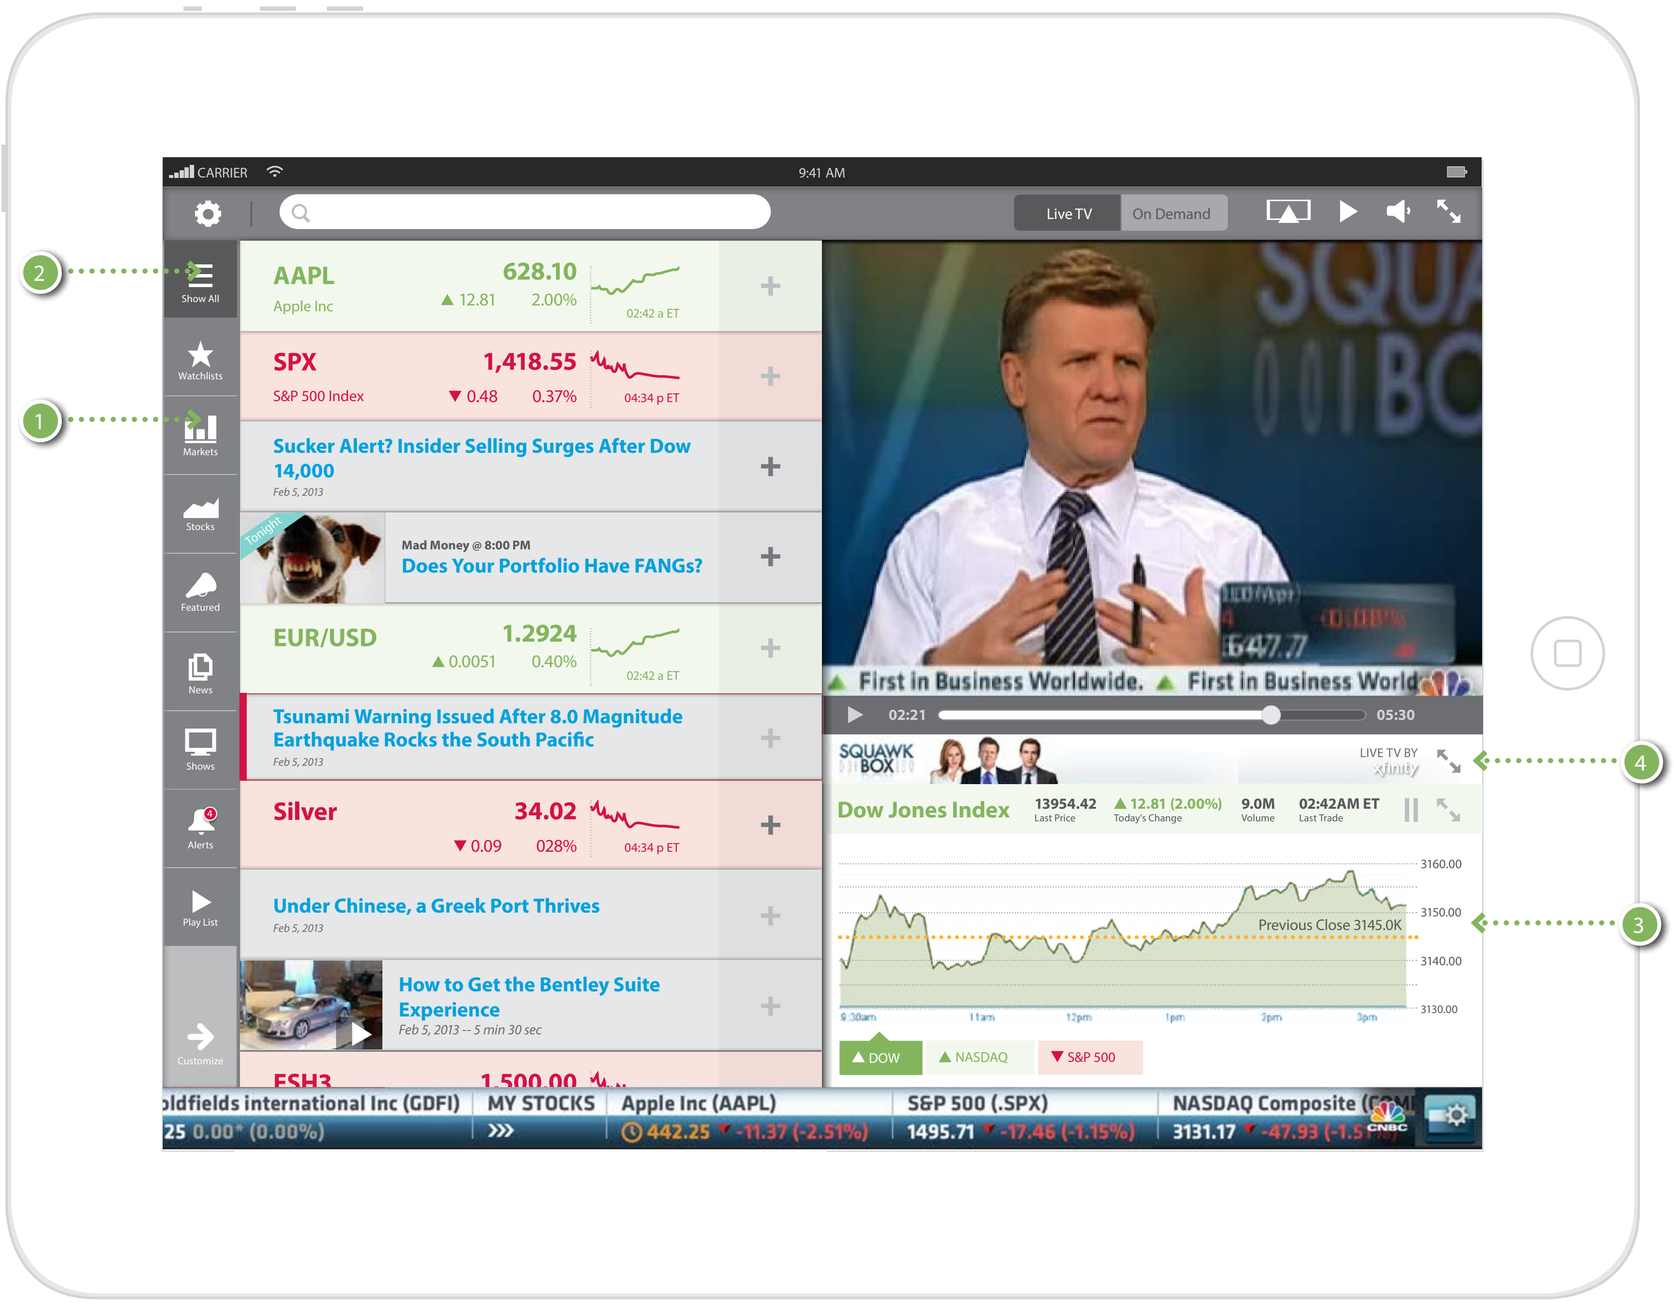
   INTERACTION

   - Tap: Removes the item from the play list

4. Item Removed

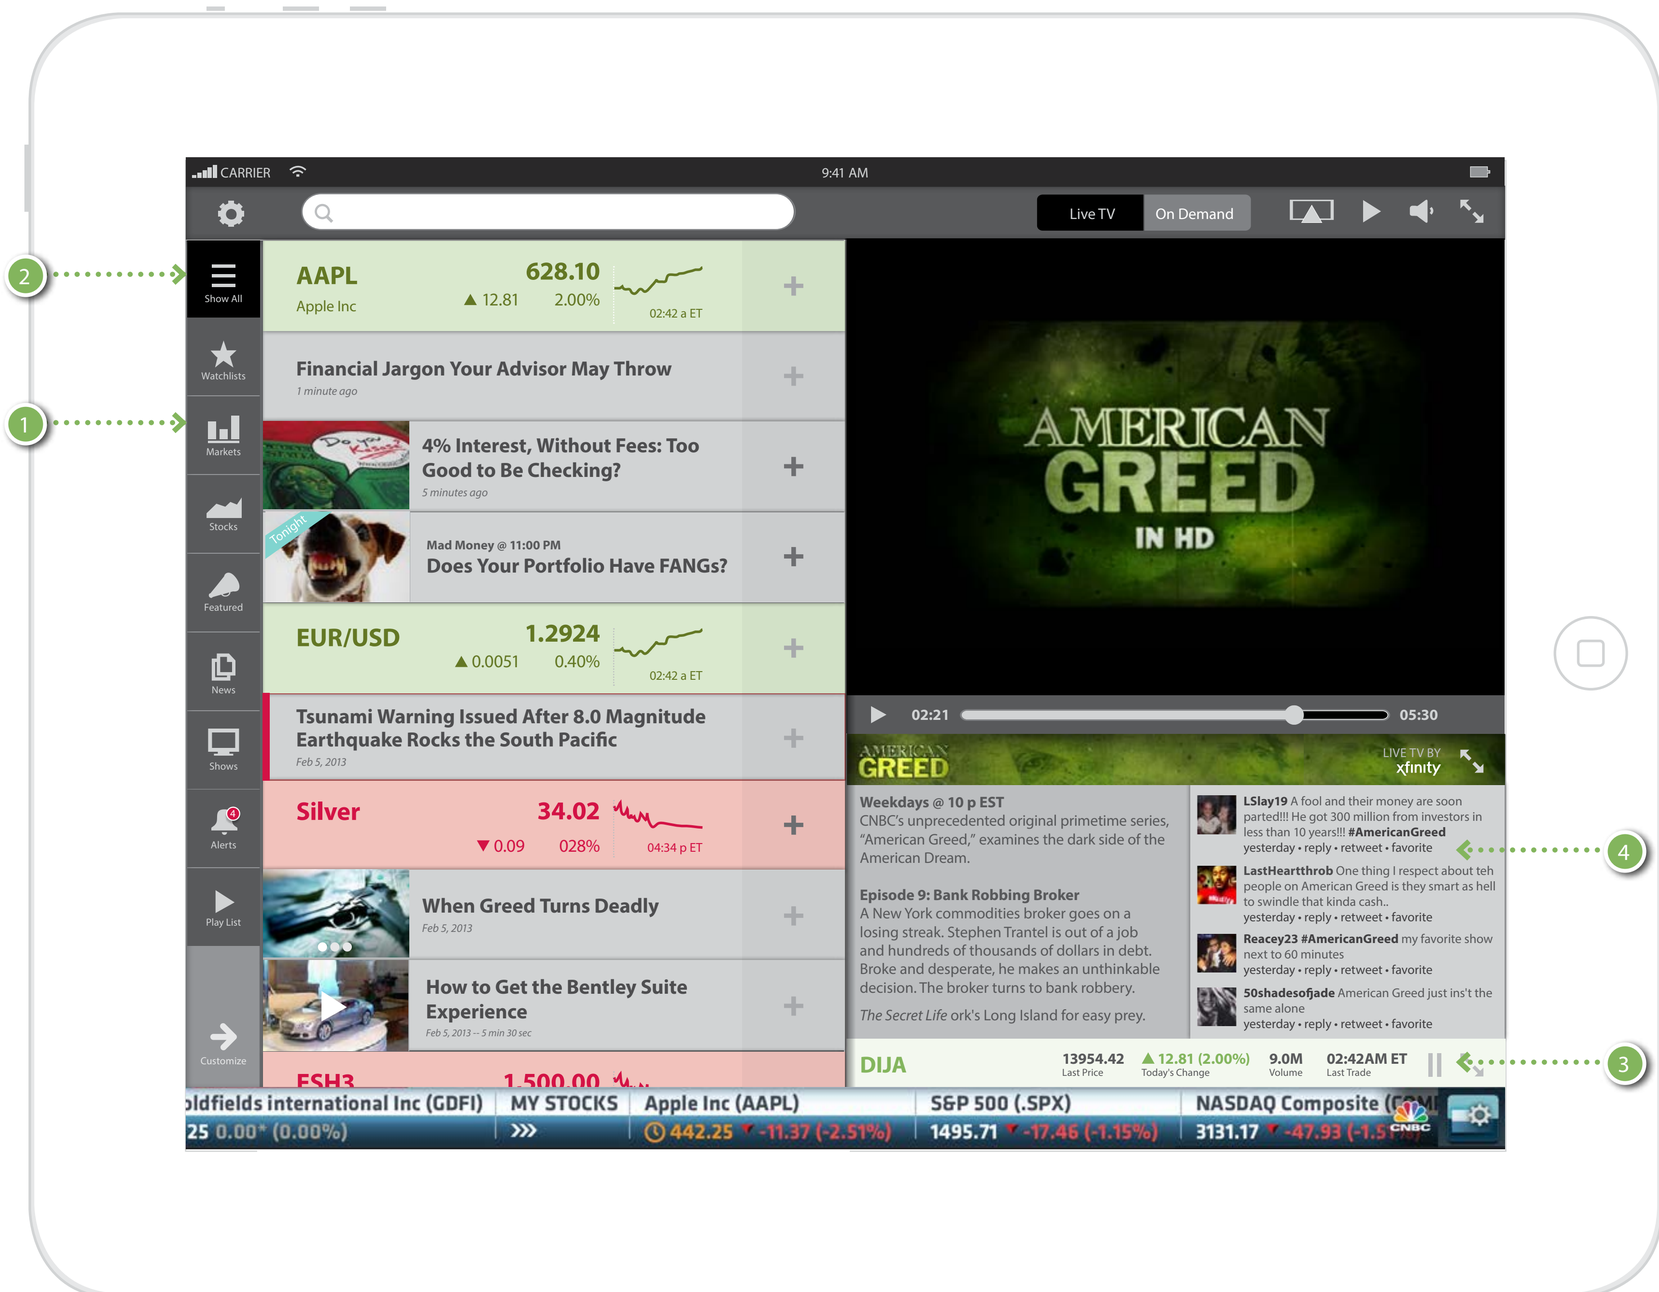
   - Reset to default state the icon and text

Business Day vs Primetime



Annotations

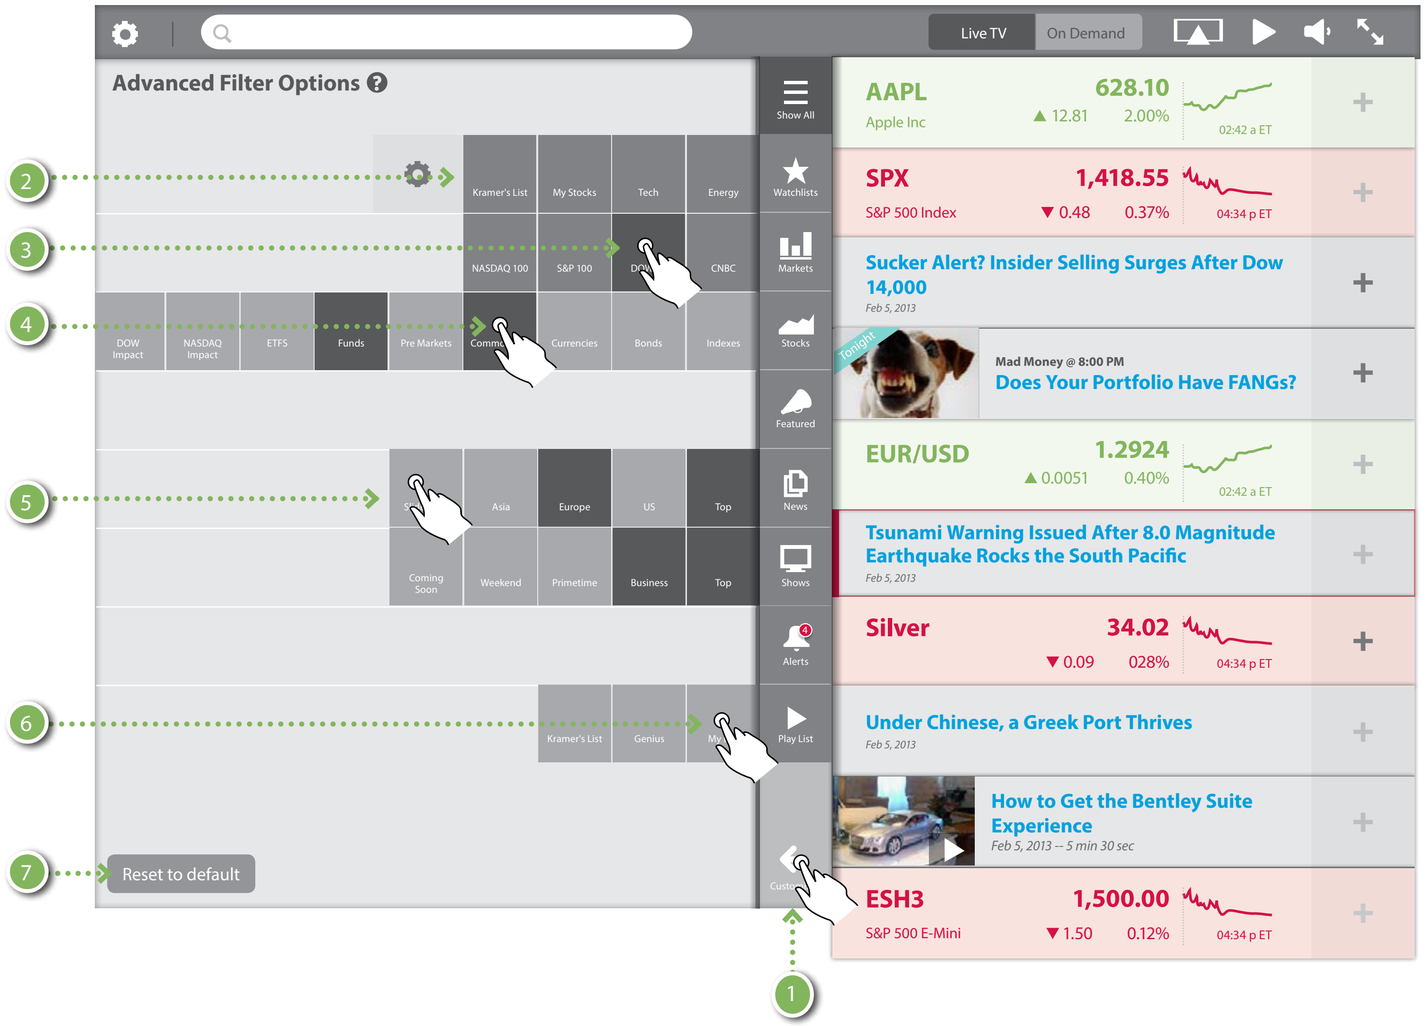
1. Skin coloring is lighter to reflect reading in daytime.
2. Feed set to "all" will likely include a mix of stocks, markets, articles, promos, videos
3. Market Panel will likely remain open
4. The LiveNow title bar can be customized editorially to allow for a logo and background banner to enhance the show's branding.



Annotations

1. Skin coloring will shift darker to reflect evening or screening room viewing. Change between modes will be animiated to appear like a dimming of the lights.
2. Feed items will likely shift naturally from stock updates to news and show-related posts. We can editorially enhance this effect by timing our show related posts to coincide with primetime hours (Think extras, behind scenes, etc).
3. Market panel will likely remain closed during this time to allow more focus on the live show's assets.
4. Primtime and weekend shows' LiveNow panel should include a live twitter feed in the right corner. The information about the show will shift left to allow this 2 column format. The LiveNow title bar can be customized editorially to allow for a logo and background banner to enhance the show's branding.

Advanced Filters



Annotations

1. Opening Advanced Filter Panel
   - Tapping or swiping the customize button will open the advanced filter panel for advanced filter selection.

   INTERACTION

   - Tap | Swipe right: The arrow icon reverses direction, the advanced filter panel slides right, pushing the feed right so that it overlays the live now and market panel.
   - Tap again | Swipe left: The arrow icon returns to default state, the advanced filter panel slides left so that it is no longer displaying, allowing the feed panel to slide left to its default position, uncovering the live now and market panels.
2. Default Advanced Filter Settings
   - By default, all advanced filters will be selected. Background color of the buttons will indicate they are all selected.
3. Select Advanced Filter
   - User will tap a filter button to filter to that item.

   INTERACTION

   - Tap: The background color changes to the single/multi item selected color, and the filter is turned on. The other items are not included in the filtered feed results, and their background colors change to de-selected state.
   - Tap additional item in that category: That additional item will be included in the filtered results, and the background color will change to selected state.
4. Multiple Advanced Filters Selected
5. De-select Advanced Filter
   - If an advanced filter is in a single / multi selected state, tapping will de-select that filter

   INTERACTION

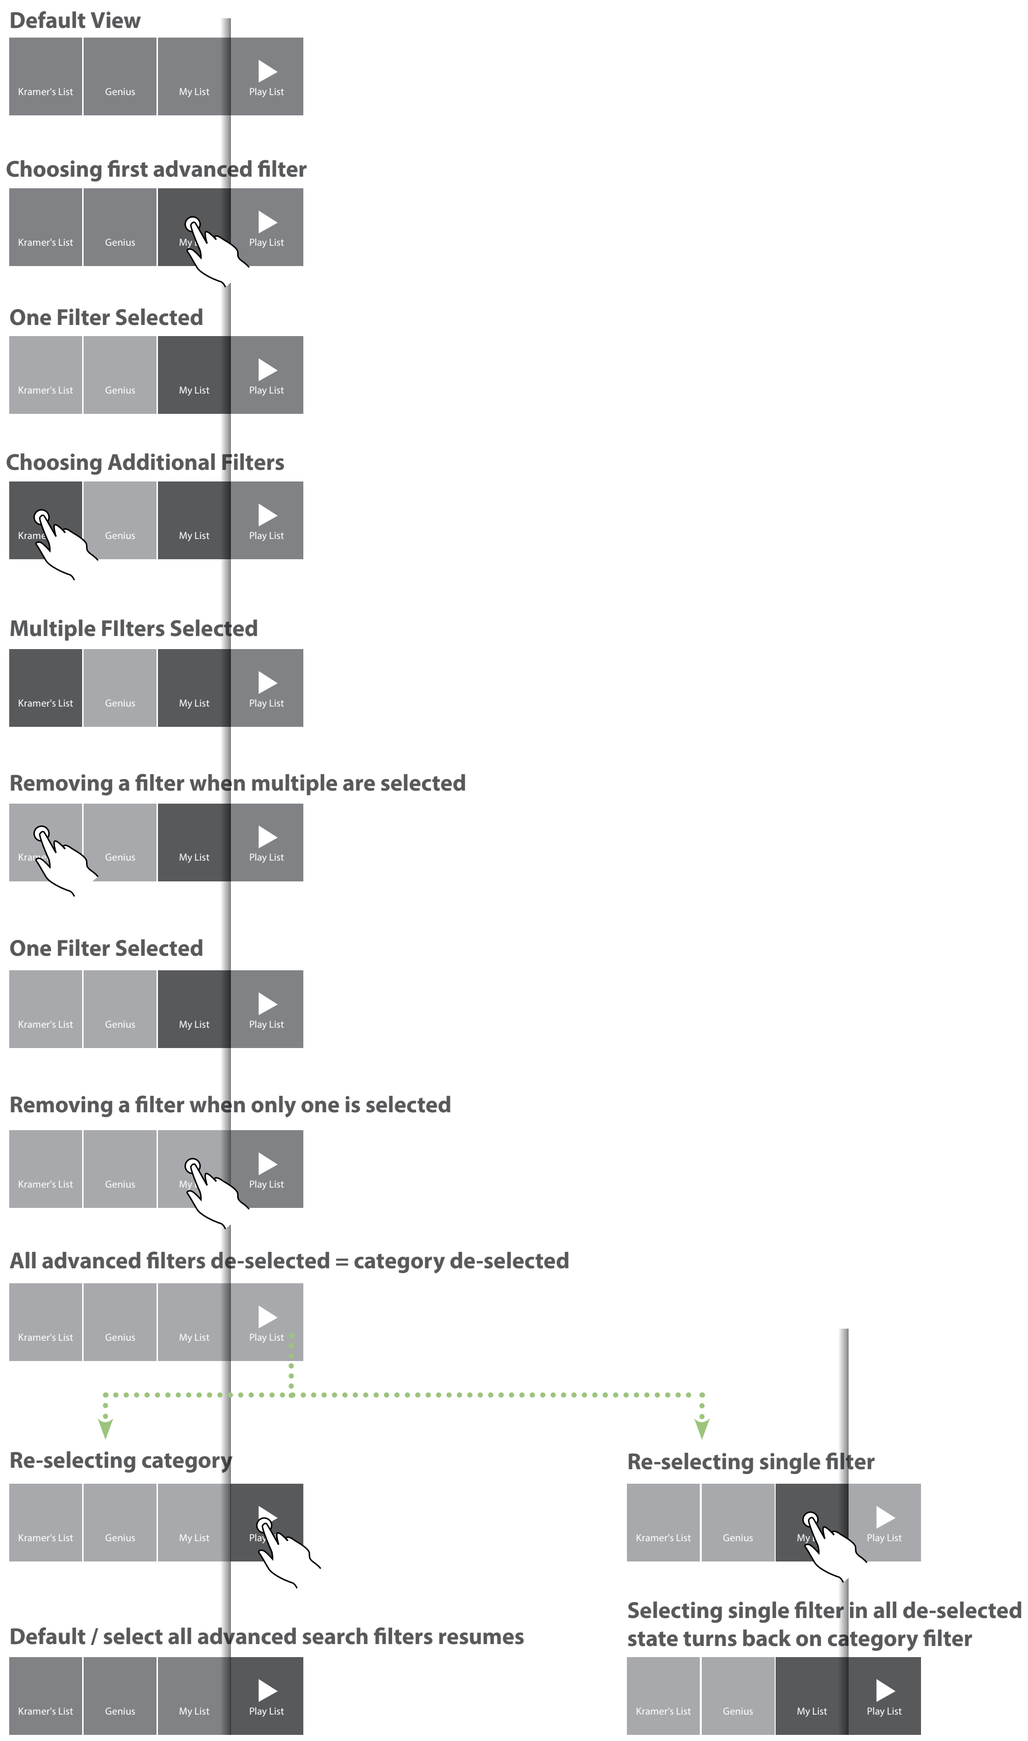
   - Tap: The background color will change to de-selected, the filter is turned off, and the results are removed from the feed for that item.
6. De-select the Last Advanced Filter in a Category
   - If a user has only one advanced filter in a category chosen, tapping that item will revert the advanced filters to select all state, but de-select the overarching category filter.

   INTERACTION

   - Tap: The background color will change to de-selected. On release, the overarching category color will change to de-selected. All items in that category will no longer display in the feed.
7. Reset Default
   - Category filters will retain advanced filter options when de-selected. In this way, a user can turn off stocks for the moment. When he clicks stocks again, it adds stocks back to the feed, with the last selected advanced filter options.
   - User can return to default settings (all selected) by clicking this reset to default button.

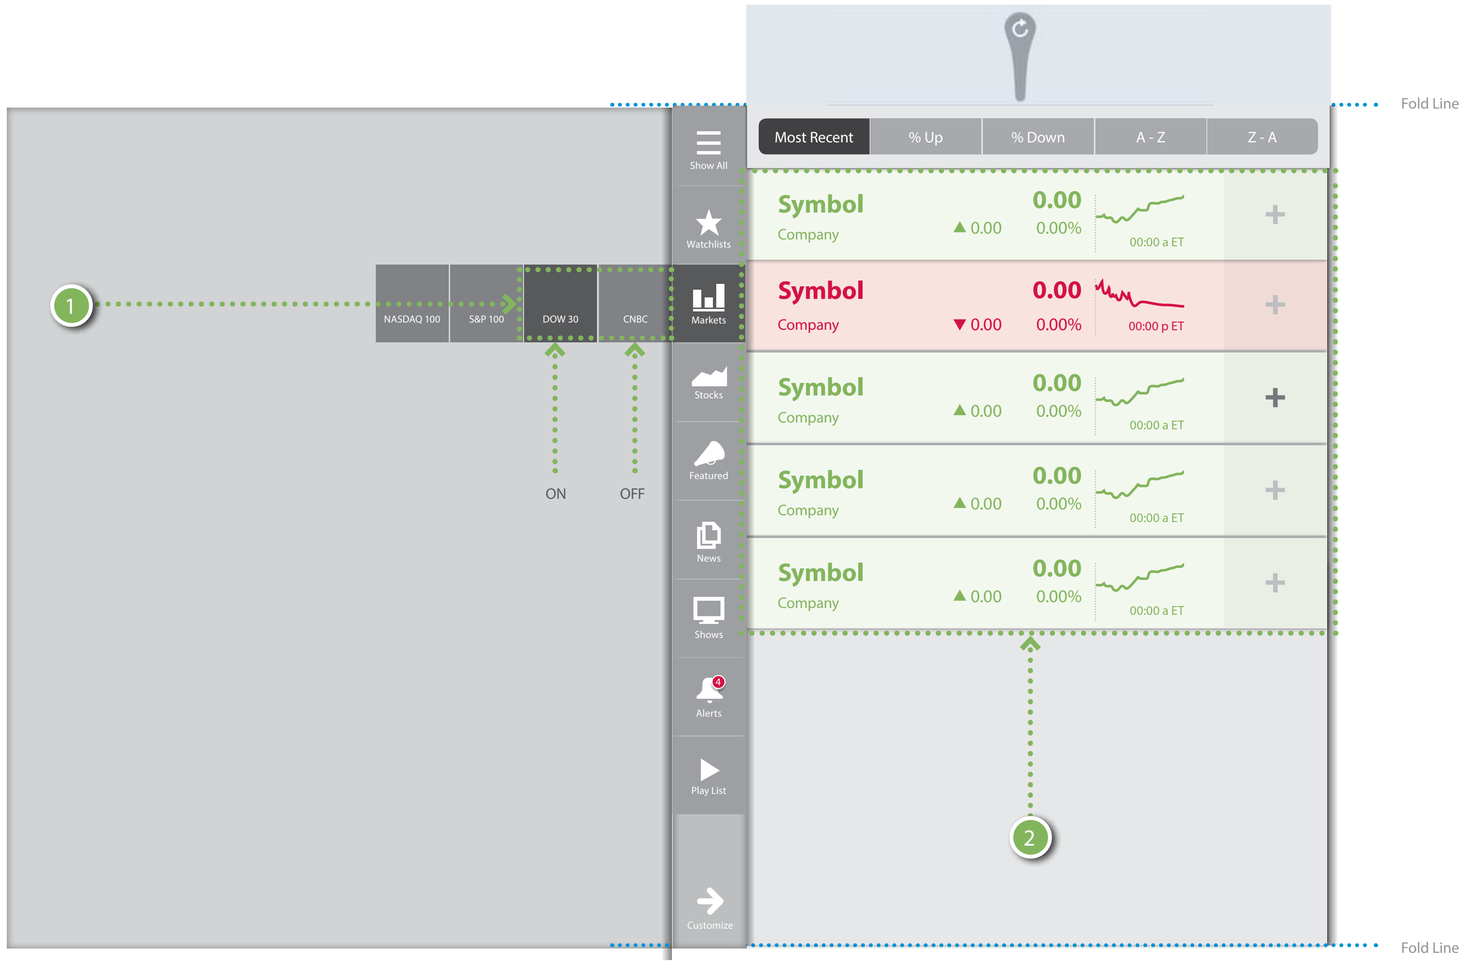
   INTERACTION

   - Tap: The background color will change to active color. All advanced filters will become selected. This will not override the current overarching category filters. (That is if stocks are de-selected, they will remain deselected, but if the user selects stocks, they will appear in the feed with all advanced filters selected.)



Annotations

1. See Notes on the Previous Page



Annotations

1. User selected Stock Filter
   - Displays only the stock filters on with advanced options on, the feed will only display stocks movers & losers from the selected filters

   CONDITION: NO FEED FILTERS OF INTEREST ARE SELECTED
