OPERATIONS and TECHNICAL SERVICES

MEDIA PRODUCTS & ADVANCED TECHNOLOGY

Challenge

Working with a very limited budget, under time sensitive constraints, and an antiquated back-end in need of upgrading, the requirement was the redesign and modernization of an internal tool for previewing upcoming TV shows, and new episodes or running shows. NBC partners and authorized merchants would then select the programs they wish to order and air on Airline Non-Theatrical, Global Networks, International Studios, NBC Network, The Late Night Shows and UPHE Acquisitions

Couple with the back-end hurdles, it was necessary that the redesign facilitated the needs of the eight unique user types, provided a better navigational flow and improved security features.

Idea

The solution needed to support personalization, flexibility and adaptability. My approach was to architect an interface that reflected all the feedback from the discovery phase while taking into account the unresolved back-end hurdles.

It was necessary to engage the 6 targeted business types over a two weeks period to conduct stakeholder interviews. The research and discovery phase would have provided concrete and in-depth information on all the issues within the current system. It was also necessary to have conversations with the engineers to understand the technical limitations, and fight for a back-end revamp.

The goal was to deliver a user-centered application, replacing an antiquated tool with a smart, modern and intuitive product.

Solution

The logic and flow for "login/forgot" password process was re-engineered to allow for easier user account management. After login, the system would serve a personalized experience of associated video content. The redesign provided a rich and modern search tool and other features for easily finding, tracking and viewing shows.

Result

Some recommendations were a little ambitious and tabled for a later release due to the time and technical constraints. However, the simplified and improved user experience significantly increased the productivity of NBC's staff and partners. The changes solved 98% of the end user's complaints and offered tools and features not initially considered by the client. The UX team was consistently praised and congratulated with positive feedback.

SIGN IN PAGE

The user will be required to enter an email address and password to access Digital Screening Room

1. Forgot Password?
   - Allows a user to request a new password from the system

   INTERACTION

   - onClick:
     - Load the 'Forgot Password' form so the user can enter their email address to request a new password. (Reference to page 12)

2. Remember Me
   - Enabling this feature will save the user time by pre filling the email address field on future visits.

   INTERACTION

   - onSubmit:

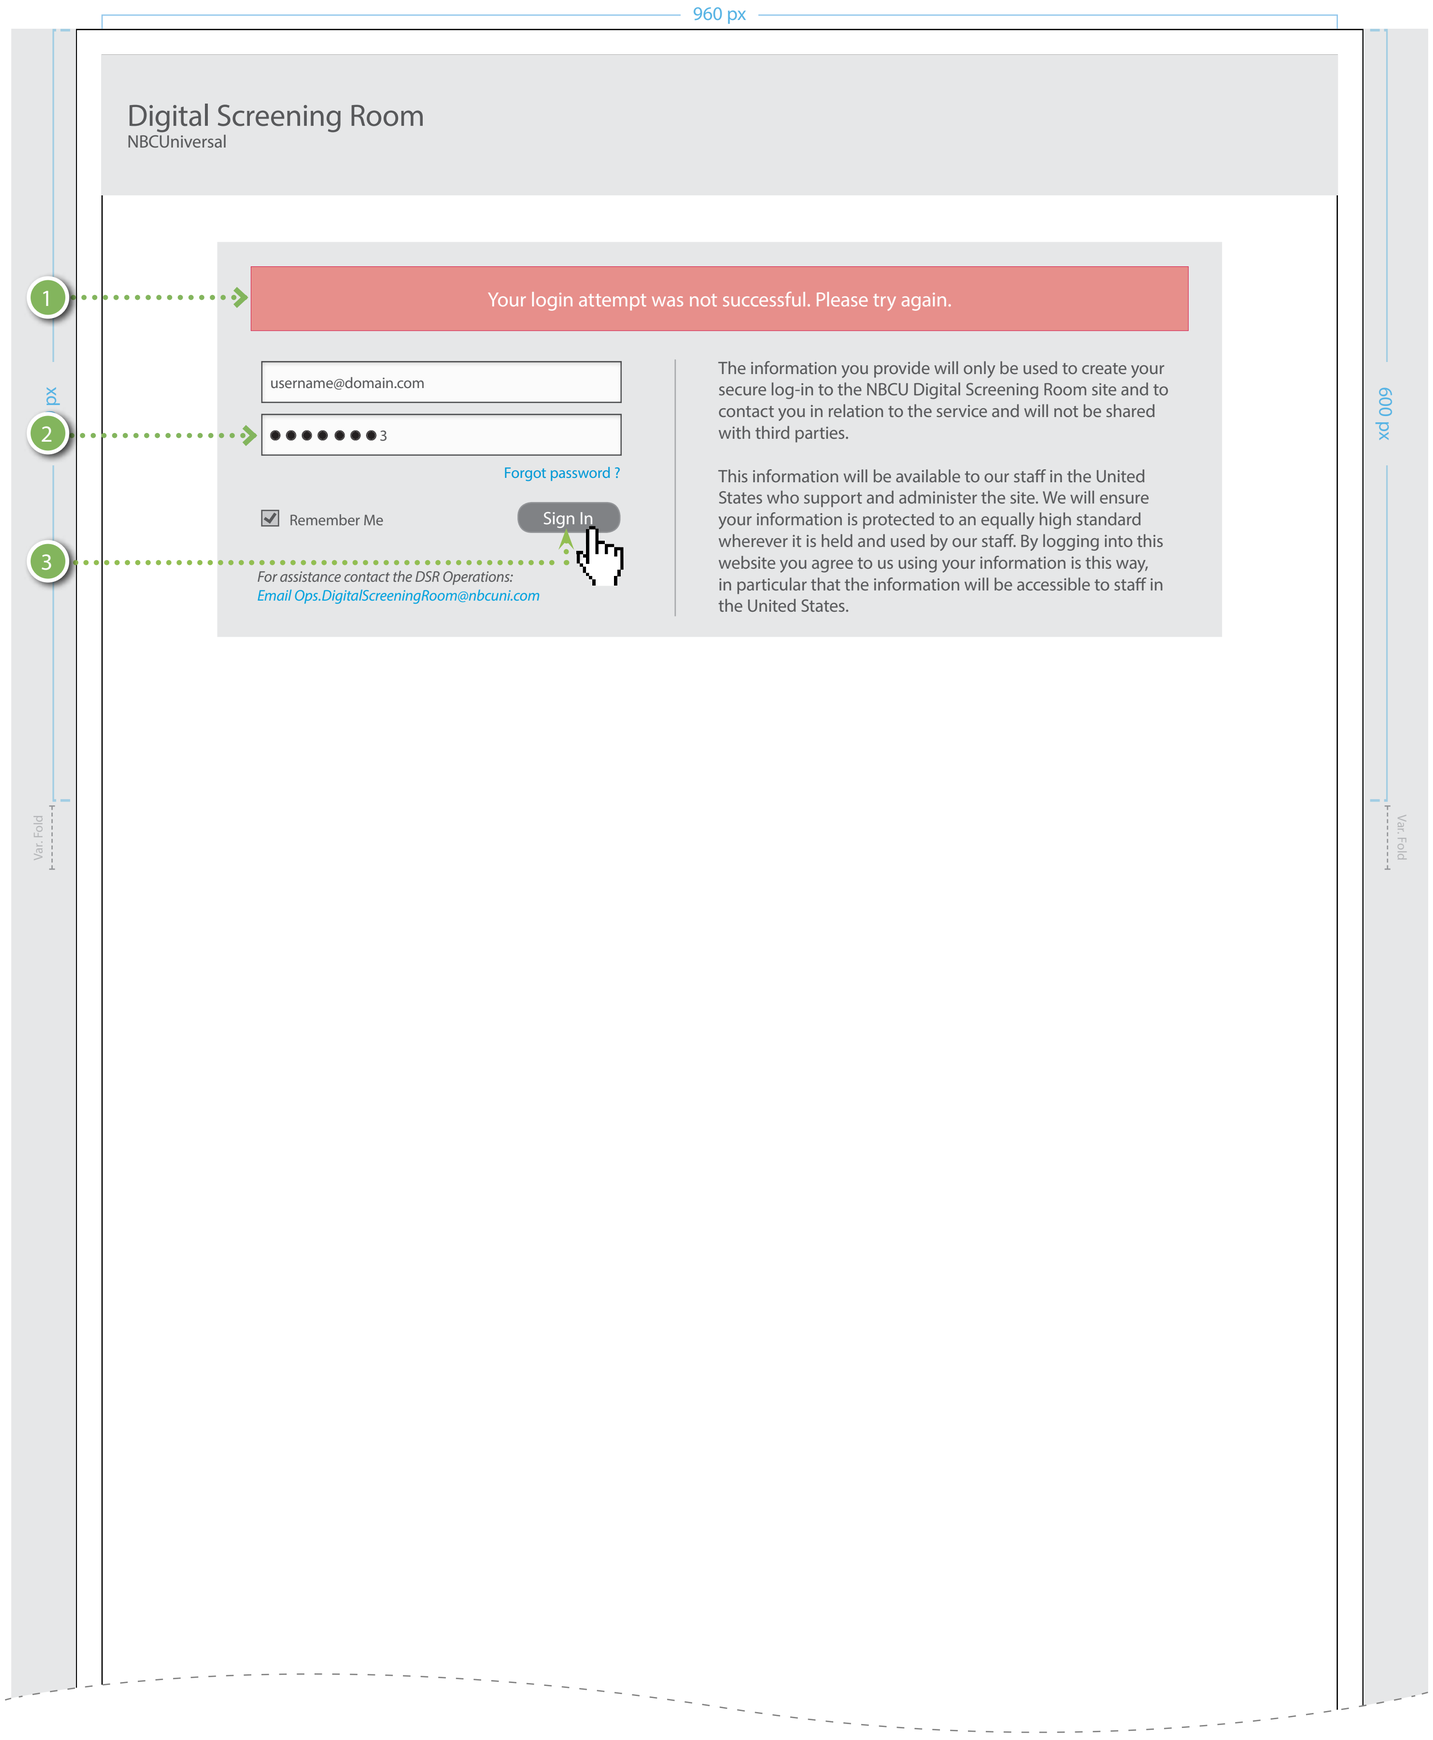
   CONDITION: THE CHECKBOX WAS SELECTED

   - Set a cookie or update the cookie that will store a record of the user's email address. This cookie will expire at a specify future date defined by the business rules

3. Email Ops
   - Send an email to the support department

   INTERACTION

   - onClick:
     - Open the user's default email client using the 'mailto:' protocol
     - Set the subject line of the email to "TBD"



Cont'd from next page

Annotations

SIGN IN PAGE WITH ERROR

1. Error Message
   - This is the placeholder to show the error message if the user has entered e=incorrect login information

2. Password
   - Use the iPhone style masking technique when entering the password.
     Examples –
     http://css-tricks.com/better-password-inputs-iphone-style/
     http://www.htmldrive.net/items/show/727/CSS3-Mask-Passwords-Like-the-iPhone.html

   INTERACTION

   - onKeyDown: Display the keystroke for a allocated time before masking

3. Sign In

   INTERACTION

   - onClick: Check the login information entered to authenticate or denied the user access

   CONDITION: LOGIN MATCH FOUND

   - redirect the user to the correct homepage depending on the assign group

   CONDITION: NO LOGIN MATCH FOUND

   - reload the sign in page displaying the error message
   - keep a count of the number of login attempts. If the user has tried 5 times, then their account will be disable and they will be redirect to page 11

GLOBAL NAVIGATION MENU

The functionality of this menu is independent and doesn't impact or update any other content on the page. Please note that all links will load the "Assets Library" page passing th value of the collection selected. The assets library will display content related to the collection

1. The List of Collections
   - Display the total number of assets in brackets within each collections
   - The width of each column will be the same, measured by the length of the longest asset
   - Sort the list alphabetically

   INTERACTION

   - onMouseOver: Highlight the background of the active selection
   - onClick: Load the assets library page and filter the content to show only assets for the selected collection
2. Sell All Content …
   - Show this menu for users with only 1 collection
   - Display the total number of assets for the user

   INTERACTION

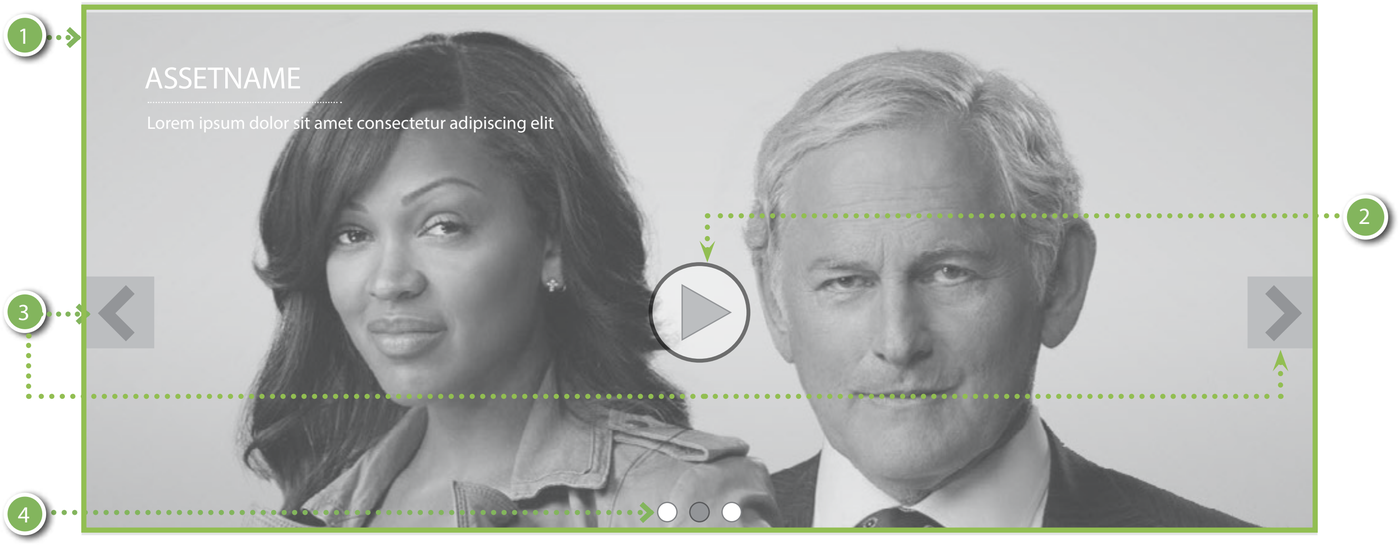
   - onClick: Load the assets library page and show all the assets for the user
3. Assets
   - Show the 5 most recently added assets

   INTERACTION

   - onMouseOver: Highlight the background of the active selection
   - onClick: Load the video player page and auto play the file
4. Sell All Recently Added …
   - Only show this link if the user has more than 5 recently added assets

   INTERACTION

   - onClick: Load the assets library page and show all the assets for the user



Annotations

1. Digital Billboard

   This module will function independently of the global menu and the recently added table of content below. All link will load the video player page

   - Display the name of the hero video with a caption

2. Play Control

   INTERACTION

   - onClick: Load the video player page and auto play the file

3. Pagination Icons

   INTERACTION

   - Left Caret - Make active if not on the first page
   - onClick: display the previous slide

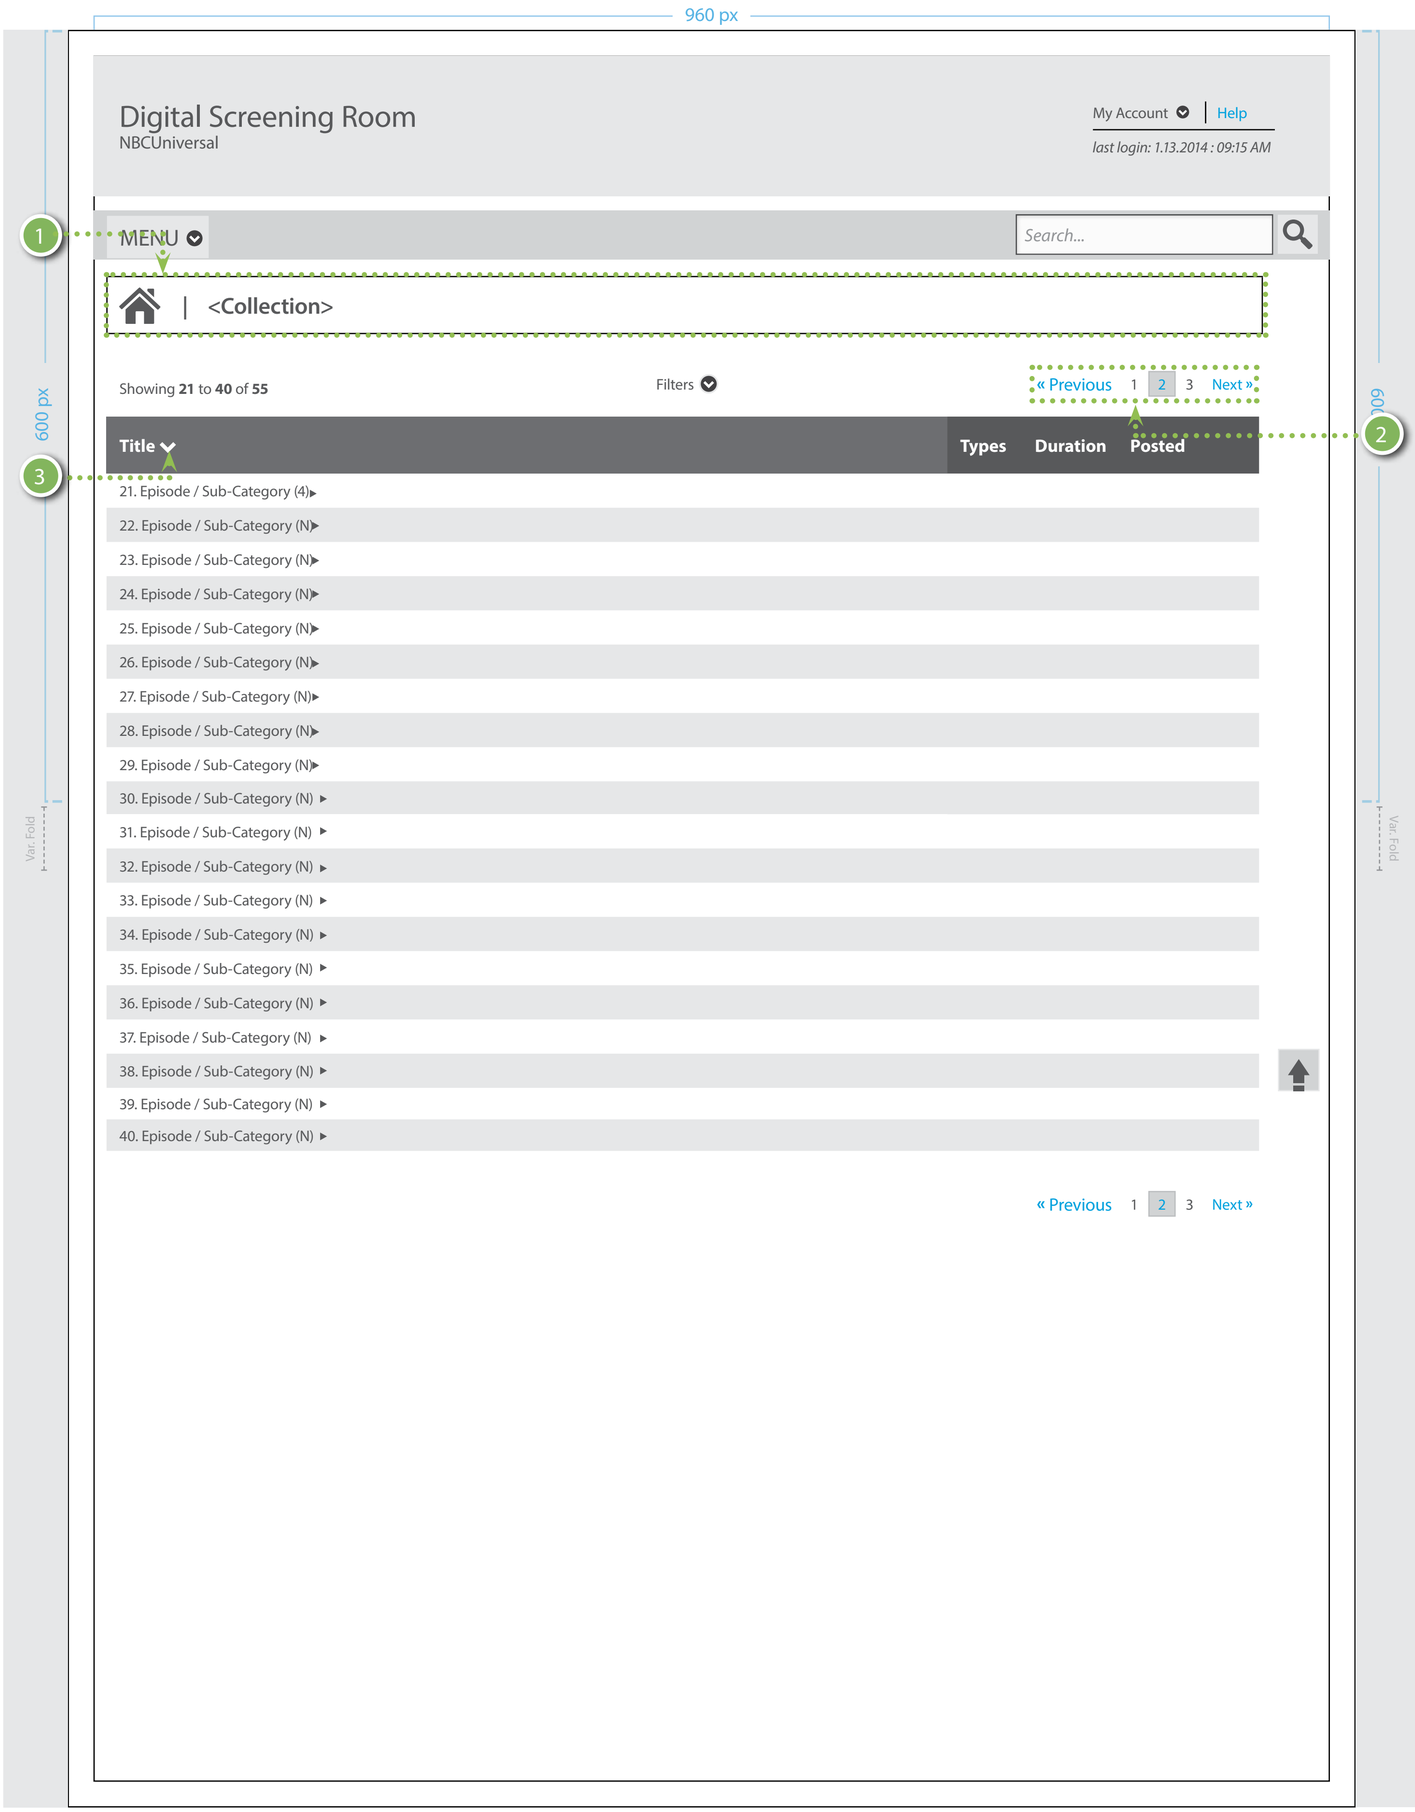
   INTERACTION

   - Right Caret - Make active if not on the last page
   - onClick: display the next slide

4. Counter Icons

   INTERACTION

   - Indicators to show the total number of featured videos
   - Highlighted the user's current position within the array



Annotations

ASSETS LIBRARY

1. Breadcrumb
   - Home - Include the "Home" link if the user is part of the sales/marketing groups
   - <Collection> - Display the name of the collection that was passed to the library page

   INTERACTION

   - onMouseOver: Underline the text

2. Pagination
   - All page numbers other than the active page will be hyperlink to that respective page.
   - Pagination displays the maximum of 5 page numbers at a time
   - Each page will contain N records

   INTERACTION
   Disable the " « Previous" link if on the first page

   - onClick: Go to previous page

   INTERACTION
   Disable the "Next »" link if on the last page

   - onClick: Go to next page

   INTERACTION
   Numbers (1, 2, 3,4 ... N etc.)

   - onClick:
     - load the selected page
     - highlight the selected number and remove hyperlink

   CONDITION: IF THE USER IS ON ONE OF THE FIRST 4 PAGES
   DISPLAY:
   - PAGE NUMBERS FOR THE FIRST 4 PAGES
   - ELLIPSES
   - THE LAST PAGE NUMBER

   1 2 3 4 ... C

   CONDITION: IF THE USER IS ON A PAGE BETWEEN THE SECOND SET AND THE LAST SET OF 4 PAGES
   DISPLAY:
   - PAGE NUMBER OF THE FIRST PAGE
   - ELLIPSES
   - THE SET OF 3 PAGES CONTAINING THE CURRENT PAGE NUMBER
   - ELLIPSES
   - THE LAST PAGE NUMBER

   1 ... 5 6 7 ... C

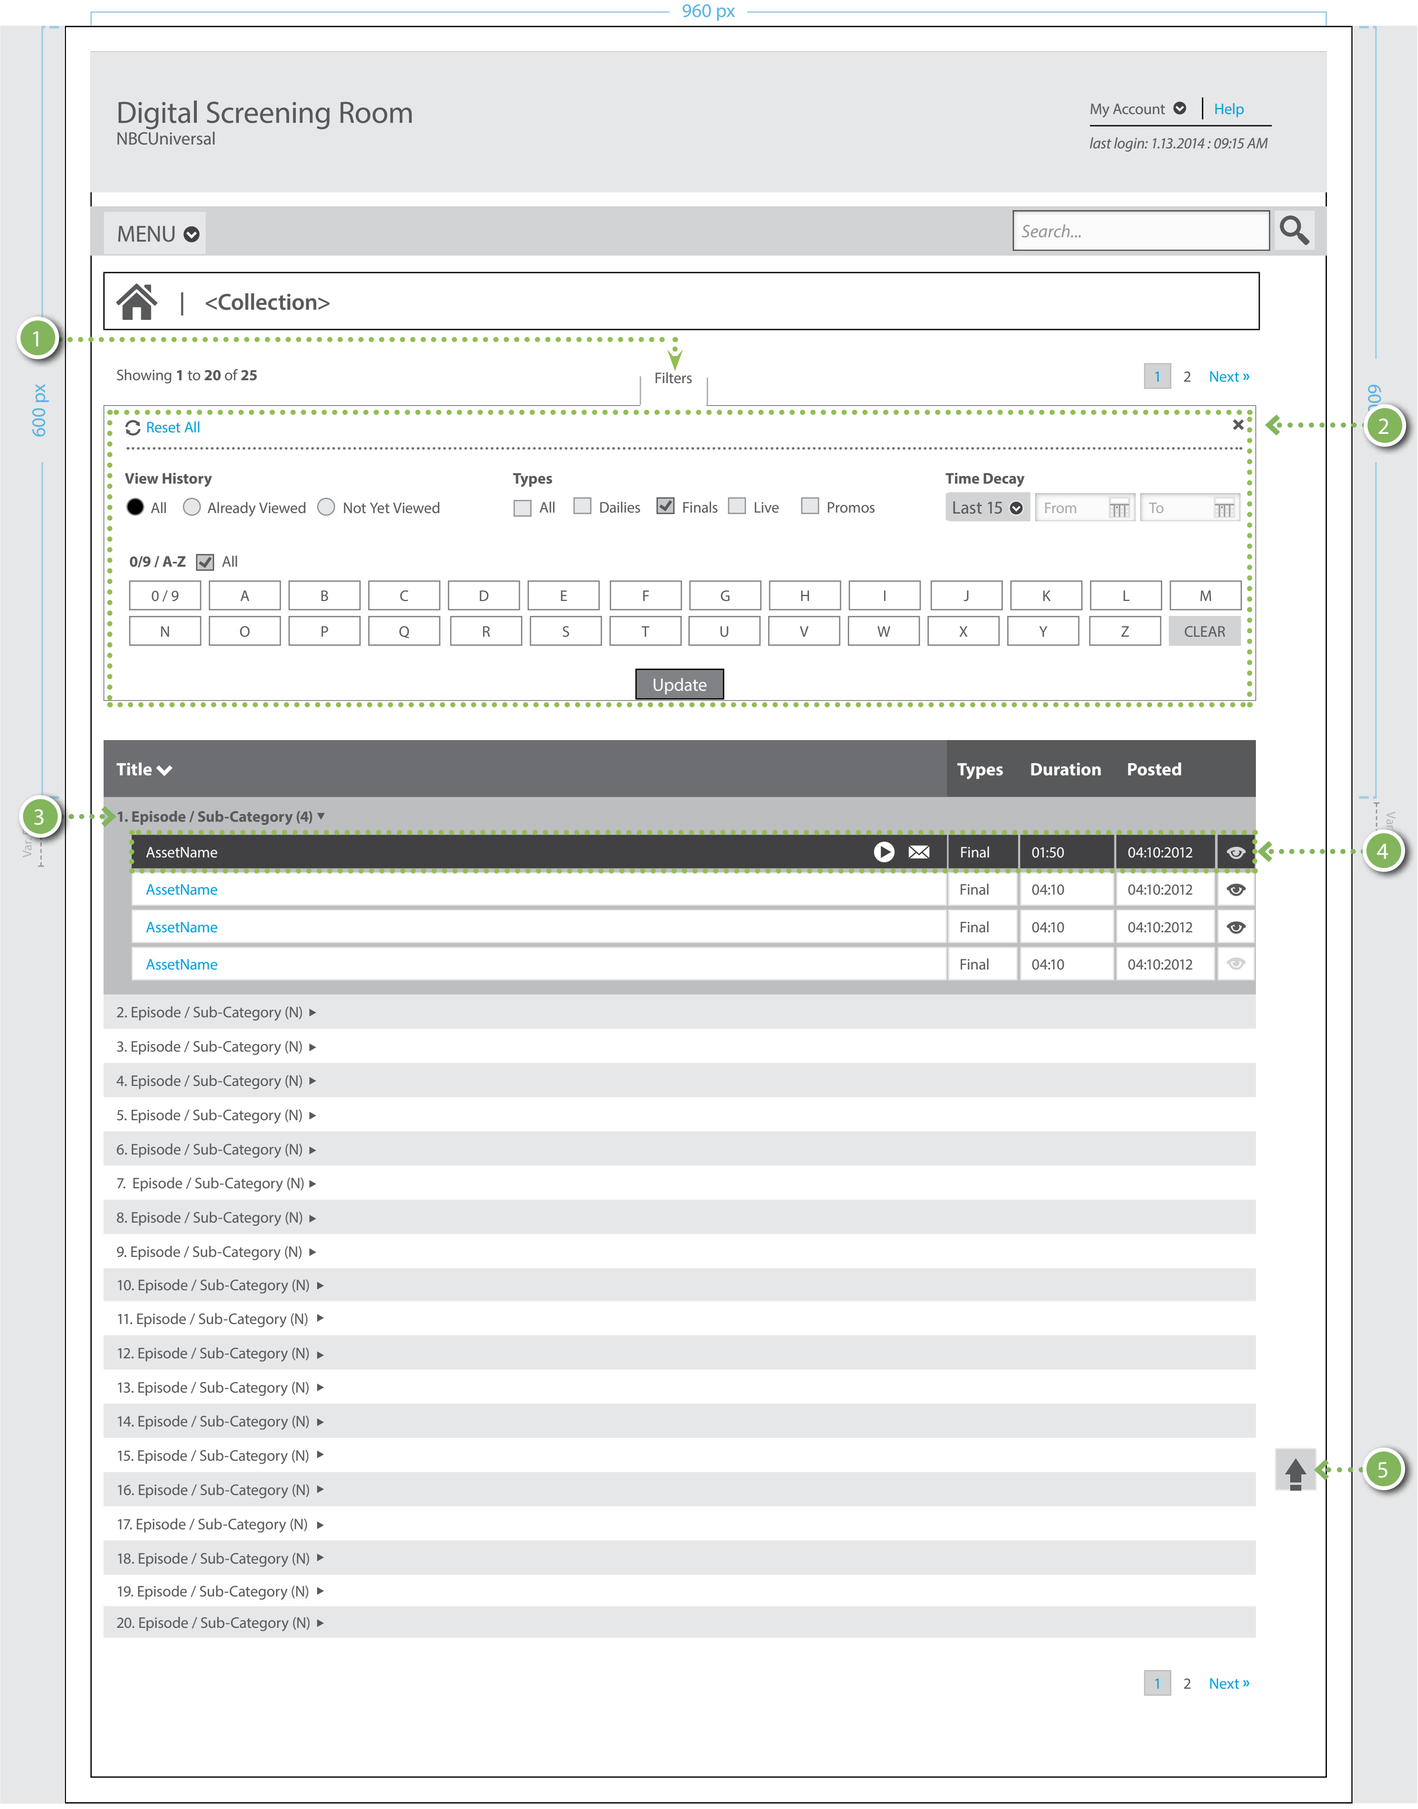
   CONDITION: IF THE USER IS ON THE LAST SET OF 4 PAGES DISPLAY:
   - PAGE NUMBER OF THE FIRST PAGE
   - ELLIPSES
   - THE LAST SET OF 4 PAGES (OR HOWEVER MANY THERE ARE FEWER THAN 4)

   1 ... 7 8 9 C

3. Sort order and icon
   - Highlight the active sort column and include the icon to show the sort order

   INTERACTION

   - onMouseOver: Highlight the background of the column header of the active column and show the sort icon in descending order
   - onClick: Sort the content in descending order based on the column selected. The sort control would be the asset groups and not the asset name



Annotations

ASSETS LIBRARY: FILTER MENU

1. Filter Menu Control

INTERACTION

- onClick: Dynamically slide open the filter menu pushing the page content below downward
- onDoubleClick: Close the menu

2. Filter Menu Content

INTERACTION

- Reset All – onClick: Reset all values to the default
- 'X' - onClick: Close the menu
- Time Decay - (Refer to annotations)
- 0/9 / A-Z – Deselect any options selected and submit the filter to show the full alphanumeric range
- Clear - Deselect any options selected and submit the filter to show the full alphanumeric range
- Update – Reload the page and filter the listing to match the criteria submitted

3. Episode / Sub-Category

- Show in brackets the number of assets within each group
- Multiple groups can be opened at the same time

INTERACTION

- onPageLoad: Open the first assets group by default.
- onClick: Dynamically open/close the asset group

4. Asset rows and tools - (Refer to annotations)

INTERACTION

ASSETNAME / ROW

- onMouseOver:
  - Highlight the background of the selected row
  - Display the tools (play, share)
- onClick: Load the video player page and auto play the file

PLAY ICON

- onMouseOver: Dynamically display message dialogue box
- onClick: Load and auto play the video in a modal window - (Refer to annotations)

SHARE ICON

- onMouseOver: Dynamically display message dialogue box
- onClick (Copy Link):
  - Copy the video player page link of the assets to the clipboard
  - Display a confirmation message
- onClick (Via Email):
  - Open the users' default email client using the 'mailto:' protocol
  - Set the subject line of the email to "TBD"

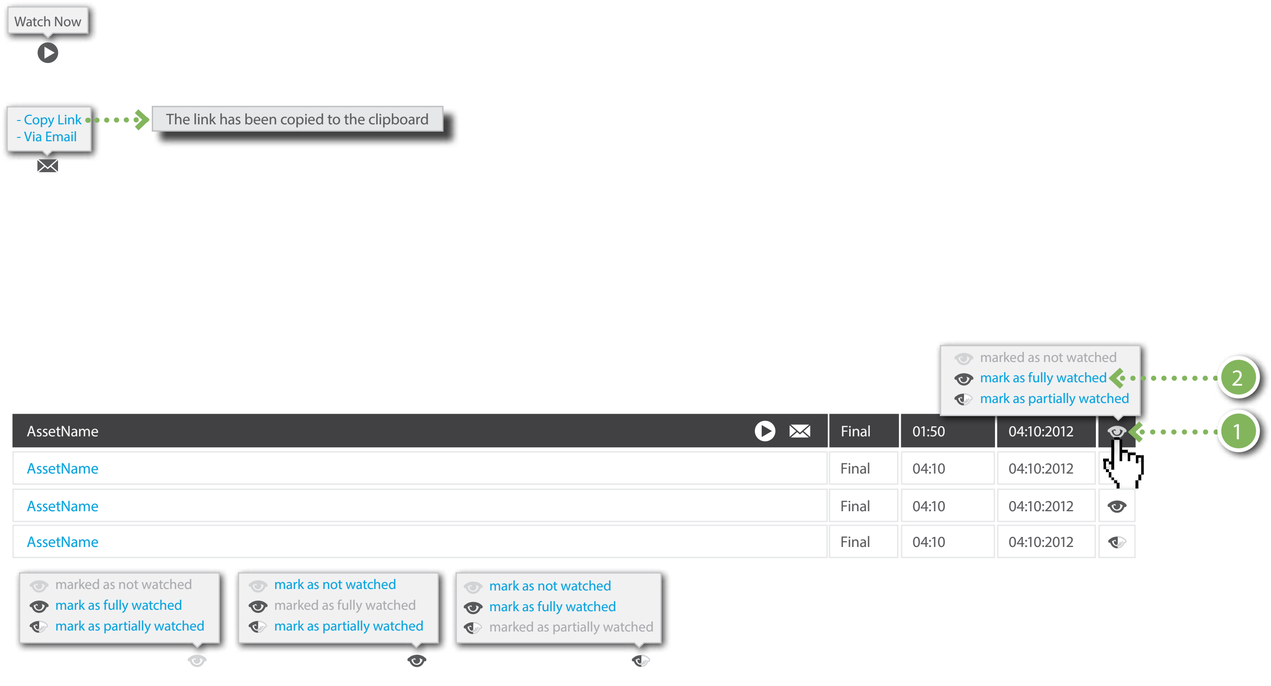
'WATCHED / NOT WATCH / PARTIALLY WATCHED' ICON - (Refer to annotations)

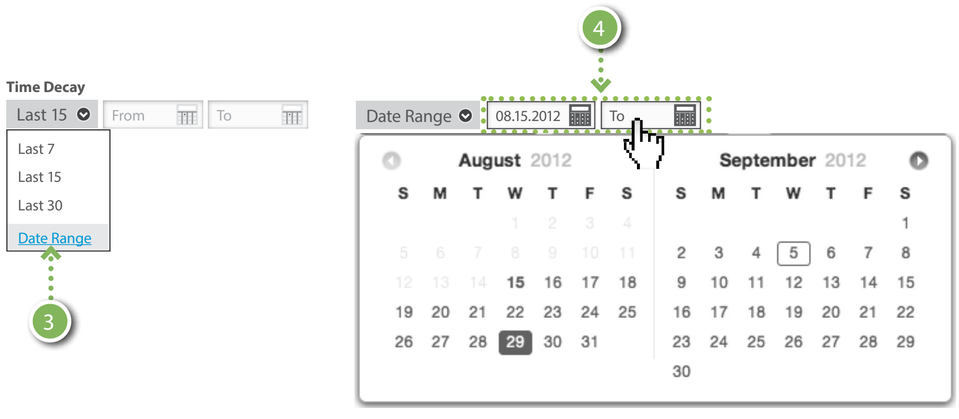
- onMouseOver: Dynamically display message dialogue box
- onClick: Change the state of the icon to tag the video accordingly

5. Back to top icon

INTERACTION

- onScroll: Dynamically display this icon when the table header reaches the top of the user's broswer
- onClick: Anchor to the top of the page





Annotations

1. View History Indicator

   These indicators will proide feedback to the user on their viewing history. The 3 available states are watched, not watched or partially watched. Each video will be tagged programmatically but the user will also has the ability to manually change the state.

   INTERACTION

   - onMouseOver: Dynamically display the message overlay to show the current state marked in gray and the other 2 states as clickable text
   - onMouseOff: Dynamically hide the message overlay

2. View History States

   INTERACTION

   - onClick:
     - Close the overlay and update the view state of the video accordingly

3. Time Decay - Date Range

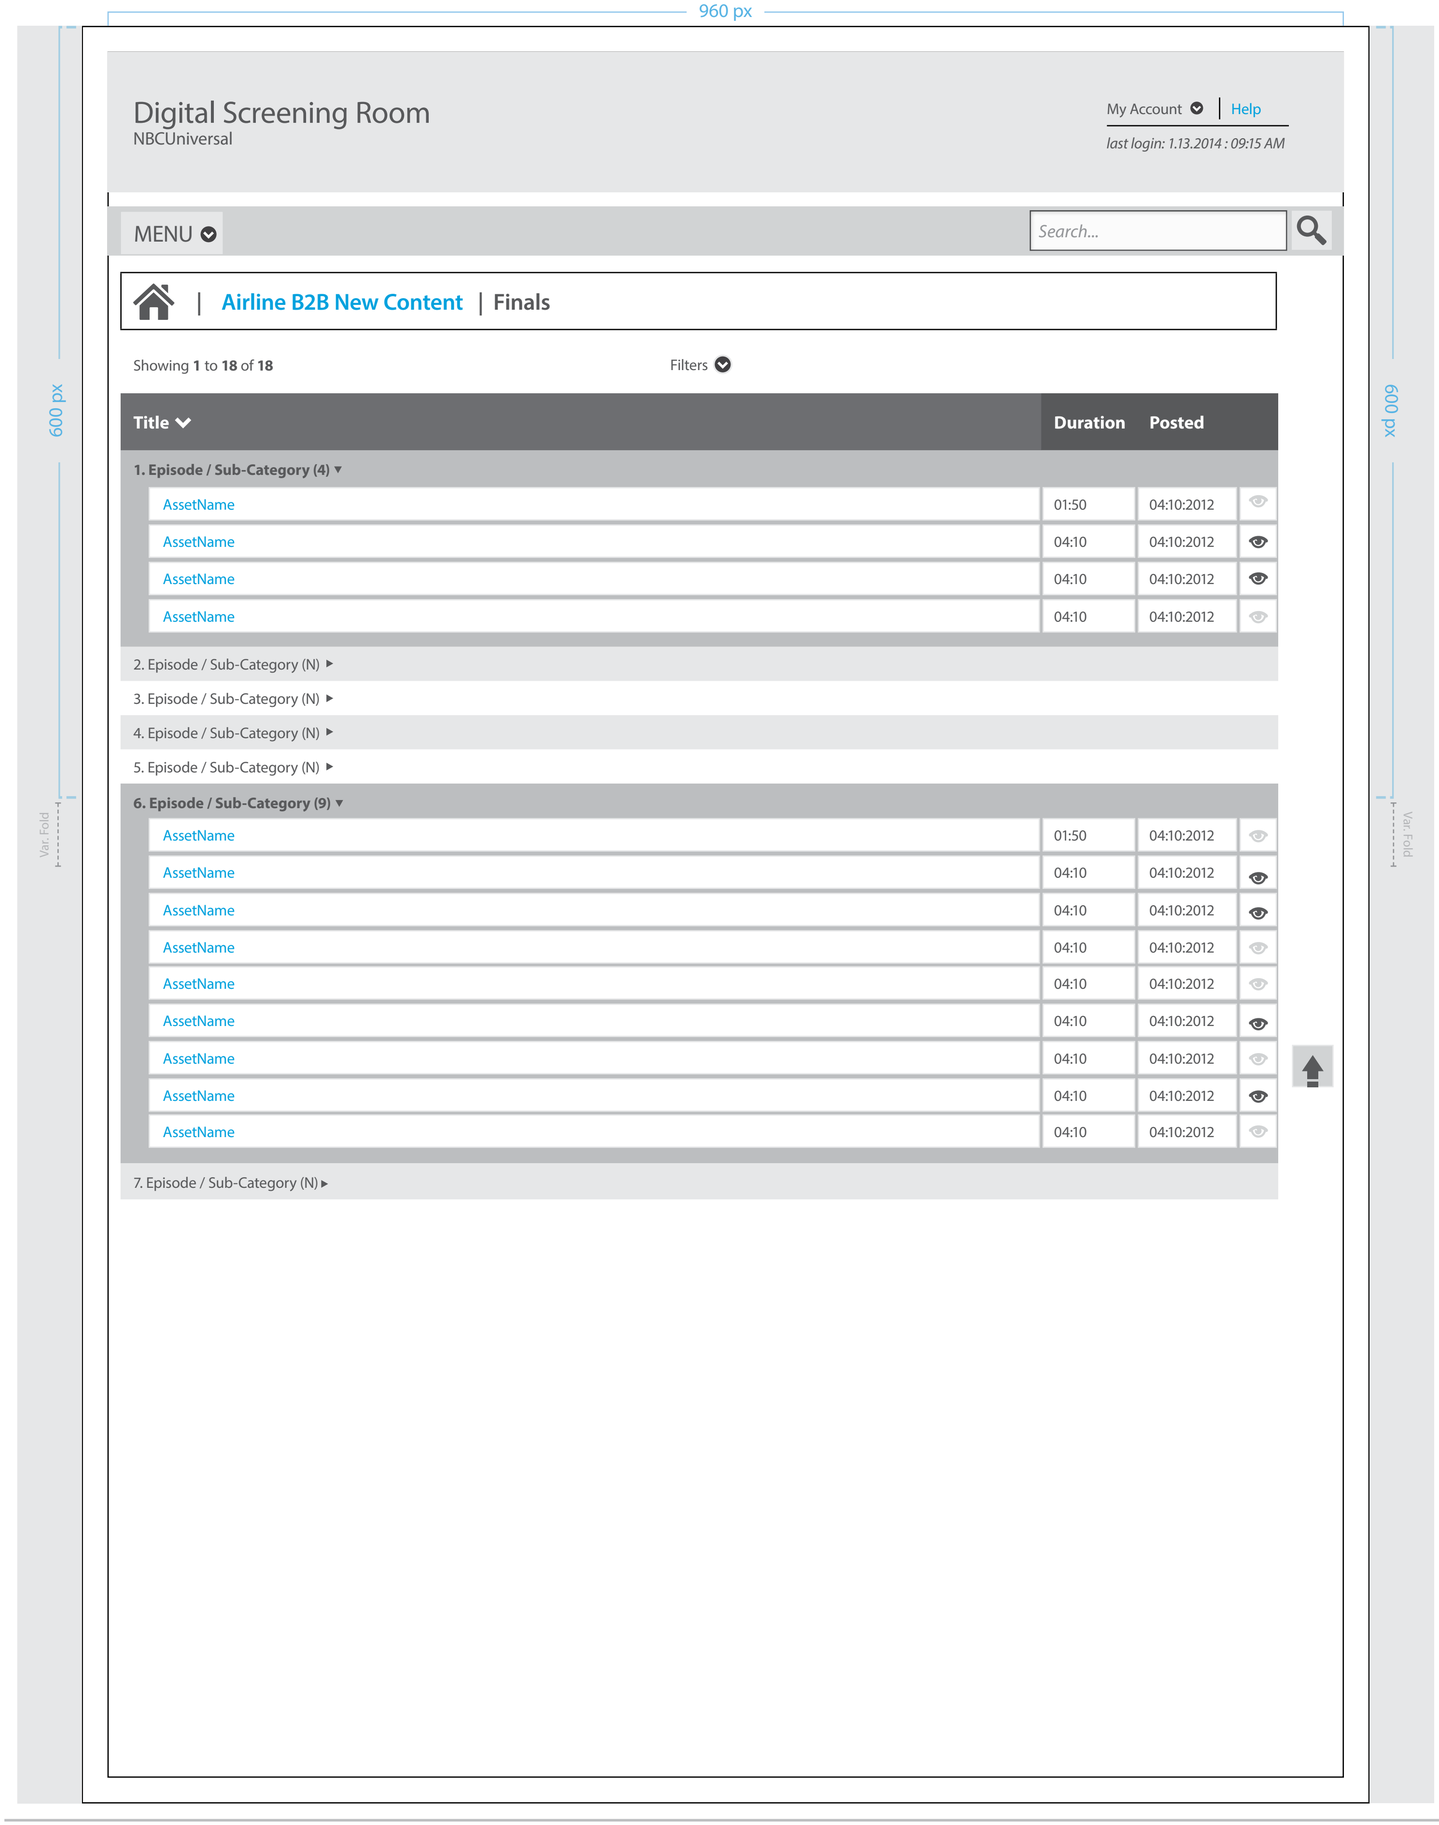
   INTERACTION

   - onSelect: Enable the "From" and "To" form fields
   - onDeselect: Disable the "From" and "To" form fields

4. Calendars

   INTERACTION

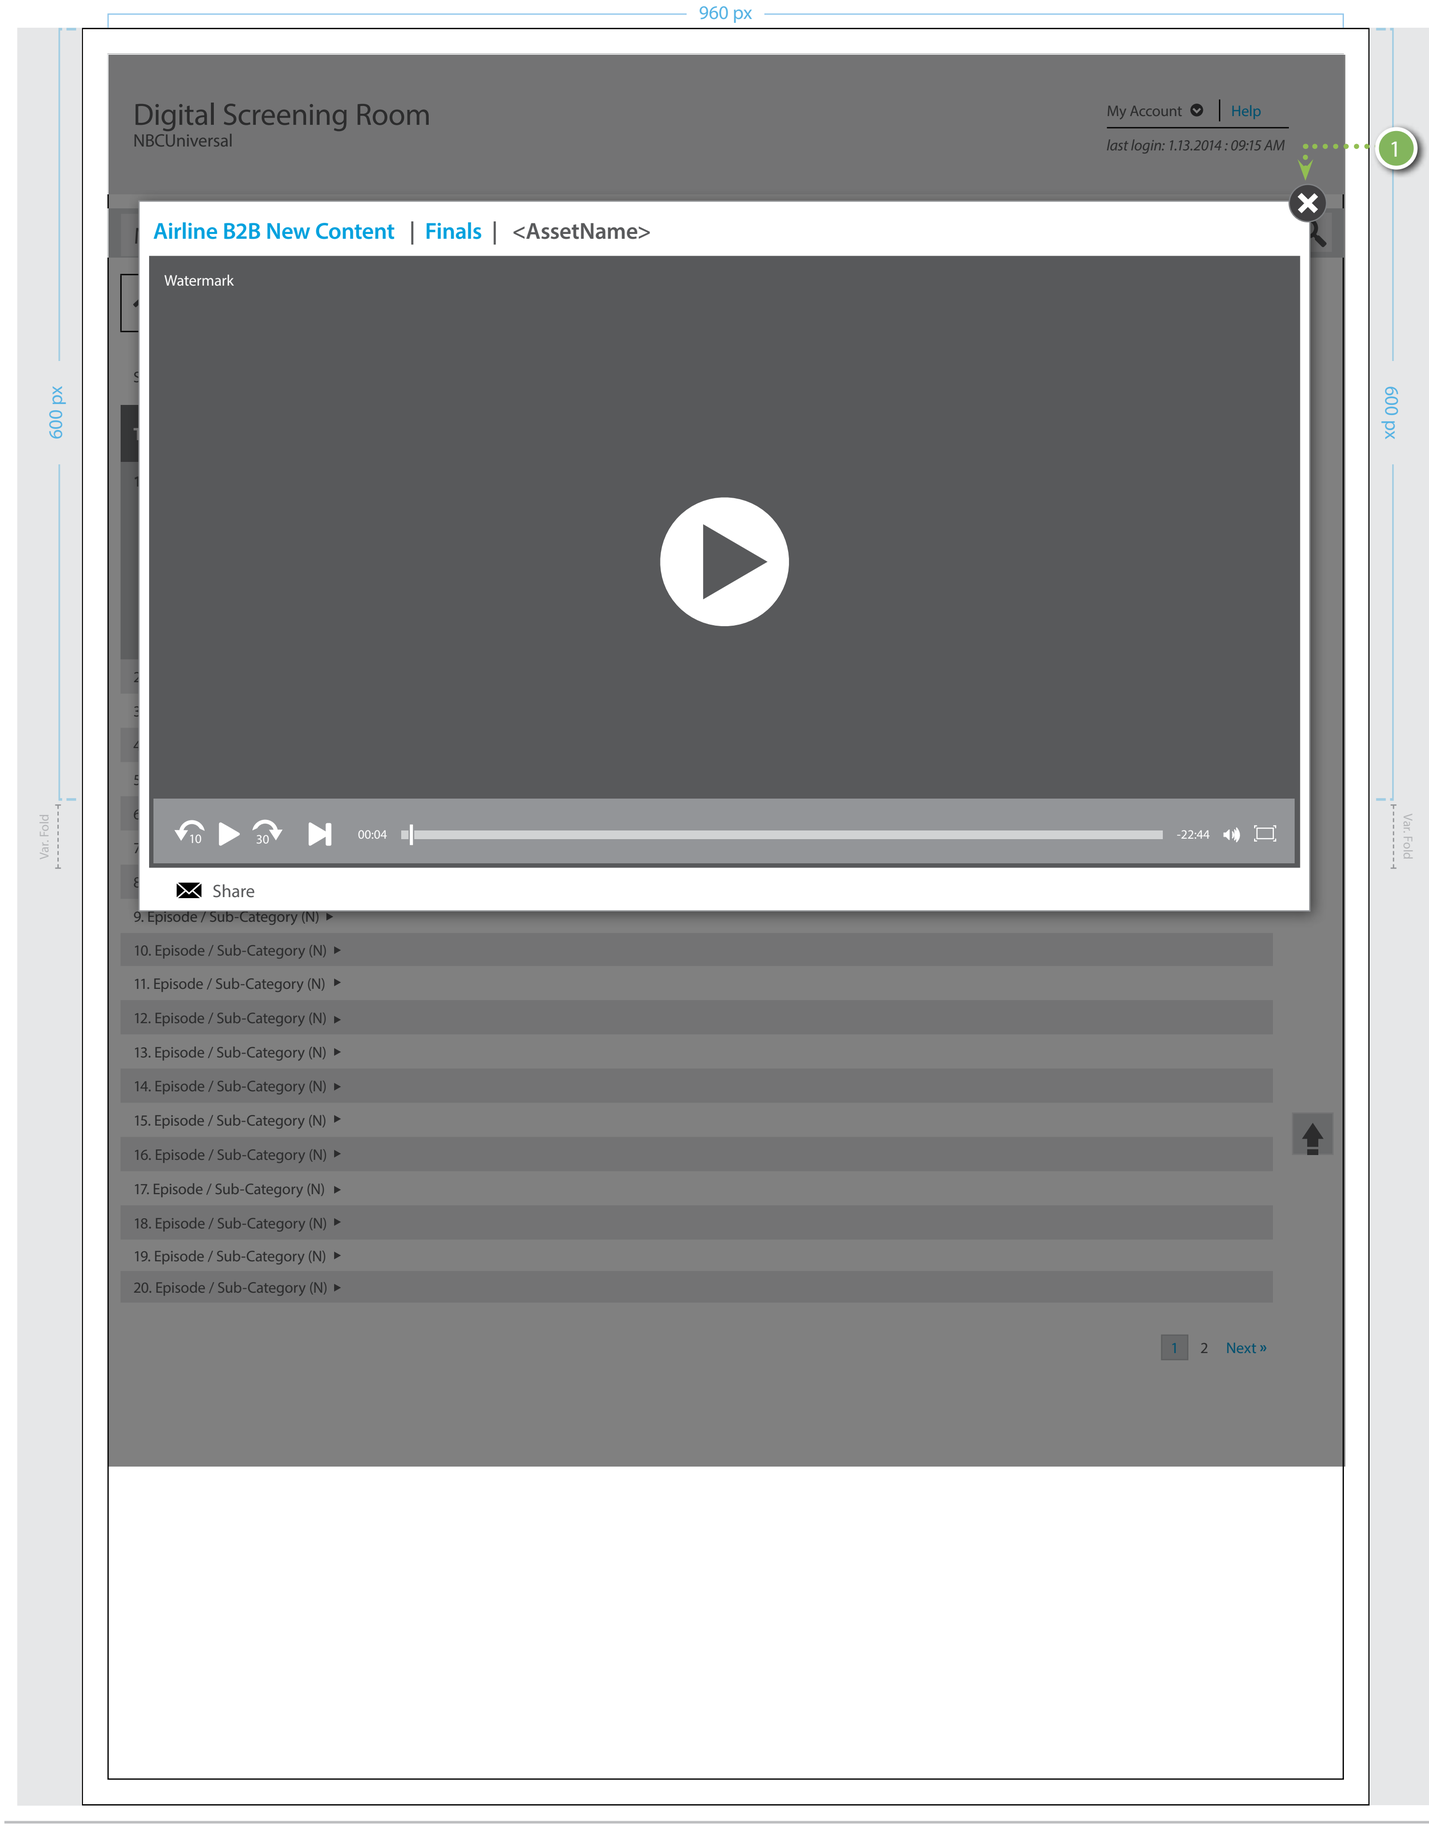
   - onClick: Dynamically display a 2 calendar months, highlighting the current date



Annotations

ASSETS LIBRARY

This is an example of the assets library after the user has filtered the content to show only "Finals".



Annotations

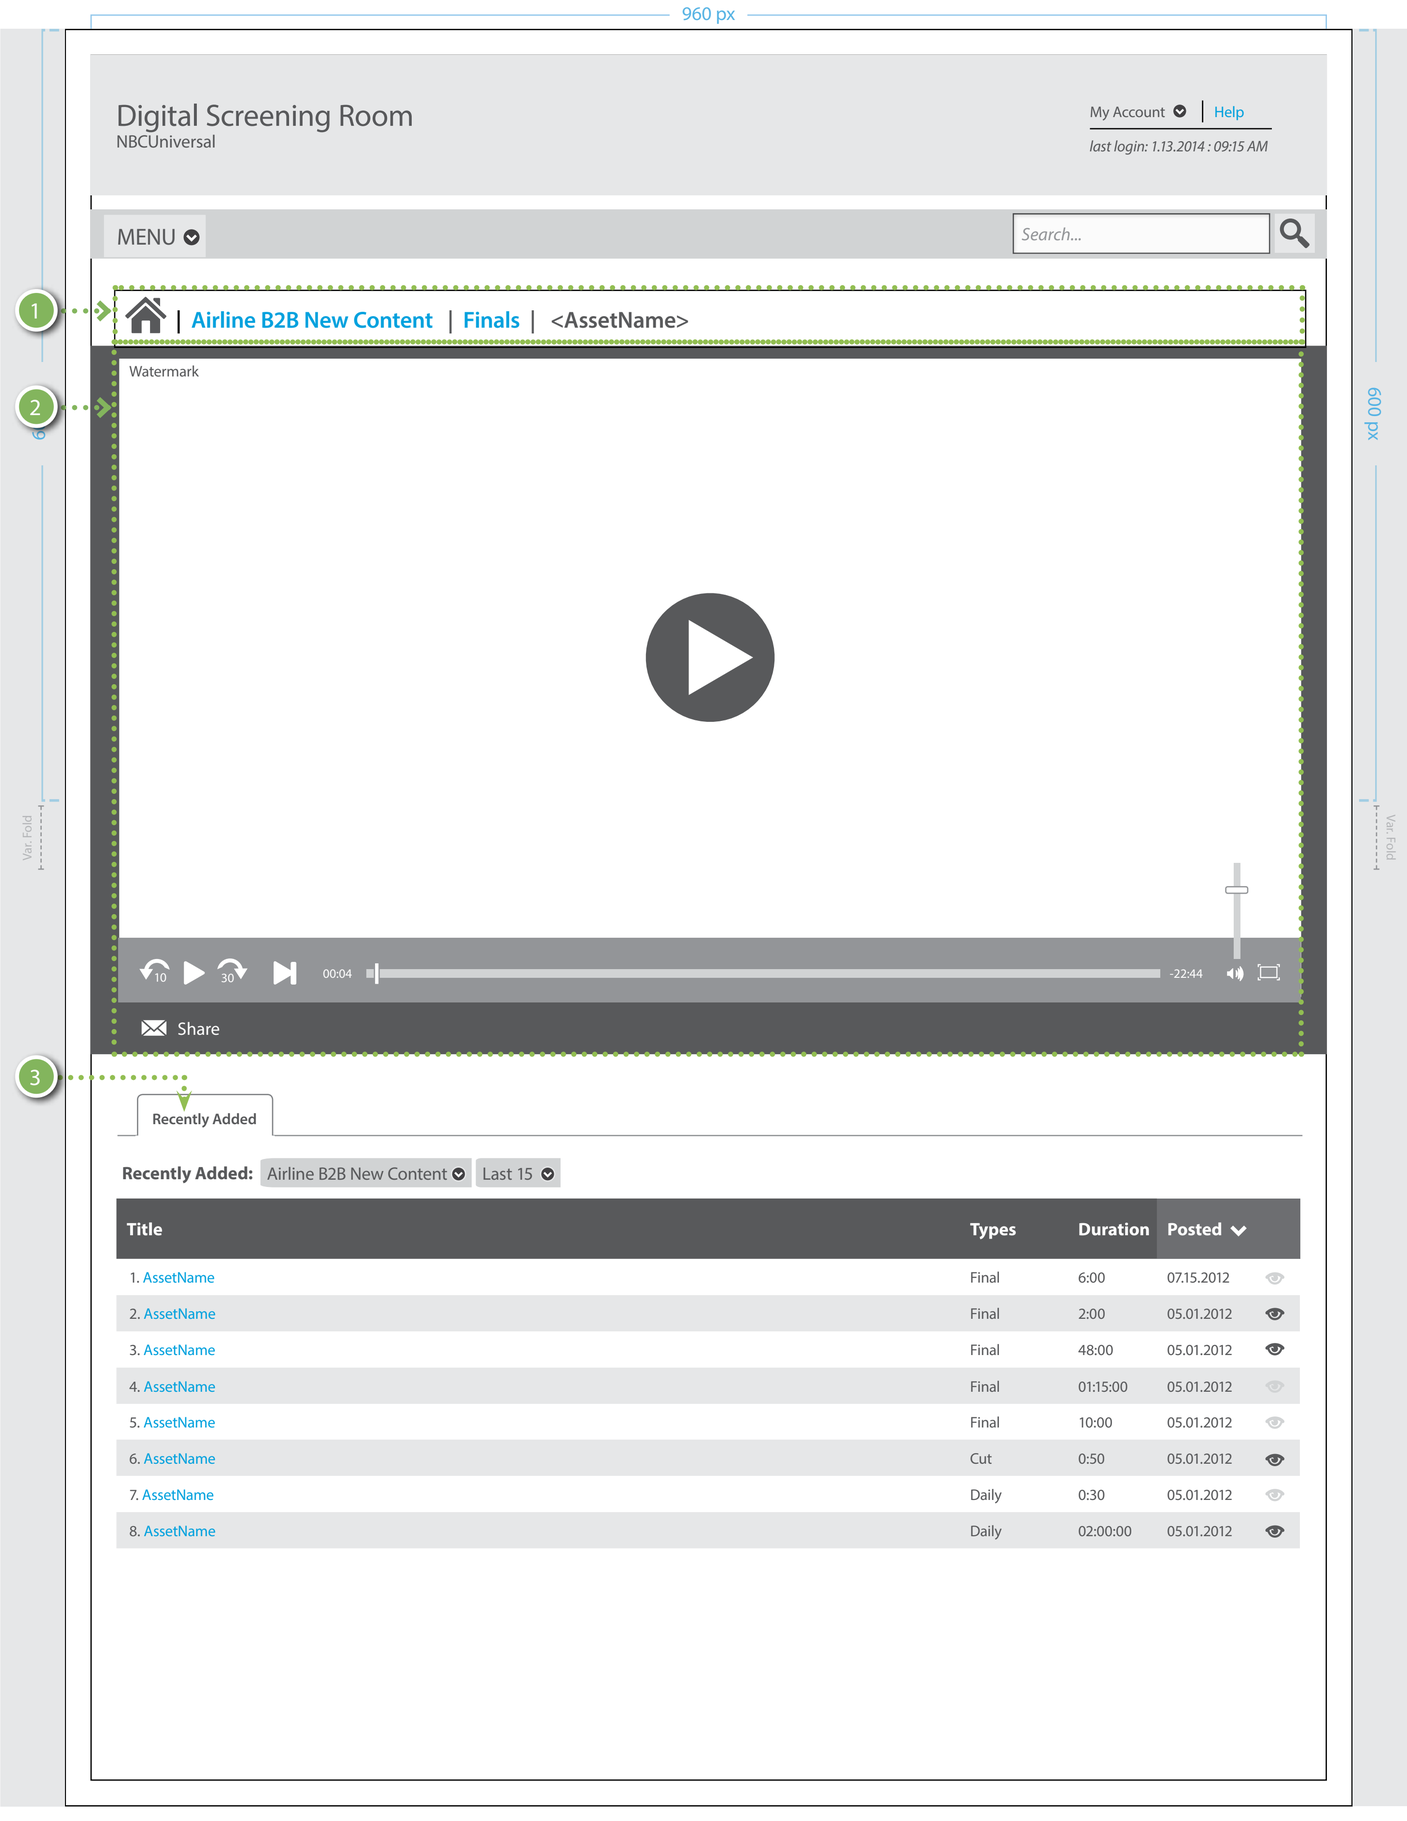
ASSETS LIBRARY : VIDEO PLAYER IN A MODAL WINDOW

A user easily can view videos in a modal window from the assets library page without having to go back and forward to the video page

1. "X" Icon

INTERACTION

- onClick: Close the modal window



Annotations

VIDEO PLAYER

1. Breadcrumb Navigation
   - onMouseOver: Underline the text

   HOME ICON

   INTERACTION

   - onClick: Load the correct homepage for the user

   AIRLINE B2B NEW CONTENT : <COLLECTION> - THIS IS THE PARENT "COLLECTION" OF THE ASSET

   INTERACTION

   - onClick: Load the assets library page and filter the content by the collection

   FINALS : <TYPE> - THIS IS THE TYPE OF THE ASSET

   INTERACTION

   - onClick: Load the assets library page and filter the content by the asset type

2. Video Interface

   Rewind
   INTERACTION
   - onClick: Rewind the video 10 seconds backward

   Play
   INTERACTION
   - onClick: Play video from the current position

   Fast Forward
   INTERACTION
   - onClick: Advance the video 30 seconds forward

   Volume 'mute/unmute' Indicator
   INTERACTION
